HUMAN SERVICES

NEW SECTION.  Sec. 201. FOR THE DEPARTMENT OF SOCIAL AND HEALTH SERVICES. (1) Appropriations made in this act to the department of social and health services shall initially be allotted as required by this act. Subsequent allotment modifications shall not include transfers of moneys between sections of this act except as expressly provided in this act, nor shall allotment modifications permit moneys that are provided solely for a specified purpose to be used for other than that purpose, except as expressly provided in subsection (3) of this section.

(2) The department of social and health services shall not initiate any services that will require expenditure of state general fund moneys unless expressly authorized in this act or other law. The department may seek, receive, and spend, under RCW 43.79.260 through 43.79.282, federal moneys not anticipated in this act as long as the federal funding does not require expenditure of state moneys for the program in excess of amounts anticipated in this act. If the department receives unanticipated unrestricted federal moneys, those moneys shall be spent for services authorized in this act or in any other legislation providing appropriation authority, and an equal amount of appropriated state general fund moneys shall lapse. Upon the lapsing of any moneys under this subsection, the office of financial management shall notify the legislative fiscal committees. As used in this subsection, "unrestricted federal moneys" includes block grants and other funds that federal law does not require to be spent on specifically defined projects or matched on a formula basis by state funds.

(3) The appropriations to the department of social and health services in this act shall be expended for the programs and in the amounts specified in this act.

NEW SECTION.  Sec. 202. FOR THE DEPARTMENT OF SOCIAL AND HEALTH SERVICES--CHILDREN AND FAMILY SERVICES PROGRAM

General Fund--State Appropriation (FY 2002) . . $ 227,442,000
General Fund--State Appropriation (FY 2003) . . $ 241,302,000
General Fund--Federal Appropriation . . . . . . . $ 357,314,000
General Fund--Private/Local Appropriation $ 400,000
Violence Reduction and Drug Enforcement Account--
The appropriations in this section are subject to the following conditions and limitations:

(1) $2,237,000 of the fiscal year 2002 general fund--state appropriation, $2,288,000 of the fiscal year 2003 general fund--state appropriation, and $1,590,000 of the general fund--federal appropriation are provided solely for the category of services titled "intensive family preservation services."

(2) $685,000 of the general fund--state fiscal year 2002 appropriation and $701,000 of the general fund--state fiscal year 2003 appropriation are provided to contract for the operation of one pediatric interim care facility. The facility shall provide residential care for up to thirteen children through two years of age. Seventy-five percent of the children served by the facility must be in need of special care as a result of substance abuse by their mothers. The facility shall also provide on-site training to biological, adoptive, or foster parents. The facility shall provide at least three months of consultation and support to parents accepting placement of children from the facility. The facility may recruit new and current foster and adoptive parents for infants served by the facility. The department shall not require case management as a condition of the contract.

(3) $524,000 of the general fund--state fiscal year 2002 appropriation and $536,000 of the general fund--state fiscal year 2003 appropriation are provided for up to three nonfacility-based programs for the training, consultation, support, and recruitment of biological, foster, and adoptive parents of children through age three in need of special care as a result of substance abuse by their mothers, except that each program may serve up to three medically fragile nonsubstance-abuse-affected children. In selecting nonfacility-based programs, preference shall be given to programs whose federal or private funding sources have expired or that have successfully performed under the existing pediatric interim care program.

(4) $1,260,000 of the fiscal year 2002 general fund--state appropriation, $1,248,000 of the fiscal year 2003 general fund--state appropriation, and $4,196,000 of the violence reduction and drug enforcement account appropriation are provided solely for the family policy council and community public health and safety networks. The funding level for the
family policy council and community public health and safety networks
represents a 25 percent reduction below the funding level for the 1999-2001
biennium. Funding levels shall be reduced 25 percent for both the family
policy council and network grants. Reductions to network grants shall be
allocated so as to maintain current funding levels, to the greatest extent
possible, for projects with the strongest evidence of positive outcomes and
for networks with substantial compliance with contracts for network grants.

(5) $2,215,000 of the fiscal year 2002 general fund--state
appropriation, $4,394,000 of the fiscal year 2003 general fund--state
appropriation, and $5,604,000 of the general fund--federal appropriation are
provided solely for reducing the average caseload level per case-carrying
social worker. Average caseload reductions are intended to increase the
amount of time social workers spend in direct contact with the children,
families, and foster parents involved with their open cases. The department
shall use some of the funds provided in several local offices to increase
staff that support case-carrying social workers in ways that will allow
social workers to increase direct contact time with children, families, and
foster parents. To achieve the goal of reaching an average caseload ratio
of 1:24 by the end of fiscal year 2003, the department shall develop a plan
for redeploying 30 FTEs to case-carrying social worker and support positions
from other areas in the children and family services budget. The FTE
redeployment plan shall be submitted to the fiscal committees of the
legislature by December 1, 2001.

(6) $1,200,000 of the fiscal year 2002 general fund--state
appropriation and $1,200,000 of the fiscal year 2003 general fund--state
appropriation are provided solely for increasing foster parent respite care
services that improve the retention of foster parents and increase the
stability of foster placements. The department shall report quarterly to
the appropriate committees of the legislature progress against appropriate
baseline measures for foster parent retention and stability of foster
placements.

(7) $1,050,000 of the general fund--federal appropriation is provided
solely for increasing kinship care placements for children who otherwise
would likely be placed in foster care. These funds shall be used for
extraordinary costs incurred by relatives at the time of placement, or for
extraordinary costs incurred by relatives after placement if such costs
would likely cause a disruption in the kinship care placement. $50,000 of
the funds provided shall be contracted to the Washington institute for
public policy to conduct a study of kinship care placements. The study
shall examine the prevalence and needs of families who are raising related
children and shall compare services and policies of Washington state with
other states that have a higher rate of kinship care placements in lieu of
foster care placements. The study shall identify possible changes in
services and policies that are likely to increase appropriate kinship care
placements.

(8) $3,033,000 of the fiscal year 2002 general fund--state
appropriation, $6,567,000 of the fiscal year 2003 general fund--state
appropriation, and $3,999,000 of the general fund--federal appropriation are
provided solely for increases in the cost per case for foster care and
adoption support. Within these amounts the department shall increase the
basic rate for foster care to an average of $415 per month on July 1, 2001,
and to an average of $425 per month on July 1, 2002. The department shall
use the remaining funds provided in this subsection to pay for increases in
the cost per case for foster care and adoption support. The department
shall seek to control rate increases and reimbursement decisions for foster
care and adoption support cases such that the cost per case for family
foster care, group care, receiving homes, and adoption support does not
exceed the amount assumed in the projected caseload expenditures plus the
amounts provided in this subsection.

(d) $2,515,000 of the violence reduction and drug enforcement account appropriation is provided solely to implement alcohol and substance abuse treatment programs for locally committed offenders. The juvenile rehabilitation administration shall award these moneys on a competitive basis to counties that submitted a plan for the provision of services approved by the division of alcohol and substance abuse. The juvenile rehabilitation administration shall develop criteria for evaluation of plans submitted and a timeline for awarding funding and shall assist counties in creating and submitting plans for evaluation.

The department shall not retain any portion of these funds to cover administrative or any other departmental costs. The department shall not retain any portion of these funds to cover administrative or any other departmental costs. The department, in conjunction with the juvenile court administrators, shall develop an equitable funding distribution formula. The formula shall neither reward counties with higher than average per-petition processing costs nor shall it penalize counties with lower than average per-petition processing costs.

(k) The distributions made under (i) and (j) of this subsection and distributions from the county criminal justice assistance account made pursuant to section 801 of this act constitute appropriate reimbursement for costs for any new programs or increased level of service for purposes of RCW 43.135.060.

(l) Each quarter during the 2001-03 fiscal biennium, each county shall report the number of petitions processed and the total actual costs of processing the petitions in each of the following categories: Truancy, children in need of services, and at-risk youth. General Fund--Local Appropriation . . . . . . . $ 5,733,000
Health Services Account Appropriation . . $ 2,450,000
TOTAL APPROPRIATION . . . . . . . . . . . . . $ 734,627,000

The appropriations in this subsection are subject to the following conditions and limitations:

(a) Regional support networks shall use portions of the general fund--state appropriation for implementation of working agreements with the vocational rehabilitation program which will maximize the use of federal funding for vocational programs.

(b) From the general fund--state appropriations in this subsection, the secretary of social and health services shall assure that regional support networks reimburse the aging and adult services program for the general fund--state cost of medicaid personal care services that enrolled regional support network consumers use because of their psychiatric disability.

(c) $388,000 of the general fund--state appropriation for fiscal year 2002, $1,927,000 of the general fund--state appropriation for fiscal year 2003, and $2,349,000 of the general fund--federal appropriation are provided solely for development and operation of community residential and support services for persons who would otherwise be served in the state psychiatric hospitals. In the event that enough patients are not transitioned or diverted from the state hospitals to close at least two hospital wards by July 2002, and two additional wards by April 2003, a proportional share of these funds shall be transferred to the appropriations in subsection (2) of this section to support continued care of the patients in the state hospitals. Primary responsibility and accountability for provision of appropriate community support for persons who would otherwise require long-term state hospital care shall reside with the mental health program and the regional support networks, with partnership and active support from the alcohol and substance abuse and from the aging and adult services programs. The department shall negotiate performance-based incentive contracts with those regional support networks which have the most viable plans for providing appropriate community support services for significant numbers of persons from their area who would otherwise be served in the state hospitals. The funds appropriated in this subsection shall be allocated to regional support networks in accordance with the incentive payment provisions of Substitute Senate Bill No. 5583, rather than according to the standard allocation formula applied in accordance with RCW 71.24.035(13)(a).
(d) At least $1,000,000 of the federal block grant funding appropriated in this subsection shall be used for (i) initial development, training, and operation of the community support teams which will work with long-term state hospital residents prior and subsequent to their return to the community; and (ii) development of support strategies which will reduce the unnecessary and excessive use of state and local hospitals for short-term crisis stabilization services. Such strategies may include training and technical assistance to community long-term care and substance abuse providers; the development of diversion beds and stabilization support teams; examination of state hospital policies regarding admissions; and the development of new contractual standards to assure that the statutory requirement that 85 percent of short-term detentions be managed locally is being fulfilled. The department shall report to the fiscal and policy committees of the legislature on the results of these efforts by November 1, 2001, and again by November 1, 2002.

(e) The department is authorized to implement a new formula for allocating available resources among the regional support networks. The distribution formula shall use the number of persons eligible for the state medical programs funded under chapter 74.09 RCW as the primary measure of the population factors which are to be considered in accordance with RCW 71.24.035(13)(a). The new formula shall be phased in over a period of no less than four years. Furthermore, the department shall increase the medicaid capitation rates which a regional support network would otherwise receive under the formula by an amount sufficient to assure that total funding allocated to the regional support network in fiscal year 2002 increases by up to 2.1 percent over the amount actually paid to that regional support network in fiscal year 2001, and by up to an additional 2.3 percent in fiscal year 2003, if total funding to the regional support network would otherwise increase by less than those percentages under the new formula, and provided that the nonfederal share of the higher medicaid payment rate is provided by the regional support network from local funds.

(f) Within funds appropriated in this subsection, the department shall contract with the Clark county regional support network for development and operation of a project demonstrating collaborative methods for providing intensive mental health services in the school setting for severely emotionally disturbed children who are medicaid eligible. Project services are to be delivered by teachers and teaching assistants who qualify as, or who are under the supervision of, mental health professionals meeting the requirements of chapter 275-57 WAC. The department shall increase medicaid
payments to the regional support network by the amount necessary to cover
the necessary and allowable costs of the demonstration, not to exceed the
upper payment limit specified for the regional support network in the
department's medicaid waiver agreement with the federal government after
meeting all other medicaid spending requirements assumed in this subsection.
The regional support network shall provide the department with (i) periodic
reports on project service levels, methods, and outcomes; and (ii) an
intergovernmental transfer equal to the state share of the increased
medicaid payment provided for operation of this project.

(g) The health services account appropriation is provided solely for
implementation of strategies which the department and the affected regional
support networks conclude will best assure continued availability of
community-based inpatient psychiatric services in all areas of the state.
Such strategies may include, but are not limited to, emergency contracts for
continued operation of inpatient facilities otherwise at risk of closure
because of demonstrated uncompensated care; start-up grants for development
of evaluation and treatment facilities; and increases in the rate paid for
inpatient psychiatric services for medically indigent and/or general
assistance for the unemployed patients. The funds provided in this
subsection must be: (i) Prioritized for use in those areas of the state
which are at greatest risk of lacking sufficient inpatient psychiatric
treatment capacity, rather than being distributed on a formula basis; (ii)
prioritized for use by those hospitals which do not receive low-income
disproportionate share hospital payments as of the date of application for
funding; and (iii) matched on a one-quarter local, three-quarters state
basis by funding from the regional support network or networks in the area
in which the funds are expended. The funds provided in this subsection
shall not be considered "available resources" as defined in RCW 71.24.025
and are not subject to the distribution formula established pursuant to RCW
71.24.035.

(b) The mental health program at Western state hospital shall continue to use labor provided by the Tacoma prerelease program of the department of corrections.

(c) The department shall seek to reduce the census of the two state psychiatric hospitals by 120 beds by April 2003 by arranging and providing community residential, mental health, and other support services for long-term state hospital patients whose treatment needs would be better served by a community placement. No such patient is to move from the hospital until a team of community professionals has become familiar with the person and their treatment plan; assessed their strengths, preferences, and needs; arranged a safe, clinically-appropriate, and stable place for them to live; assured that other needed medical, behavioral, and social services are in place; and is contracted to monitor the person's progress on an ongoing basis. The department and the regional support networks shall endeavor to assure that hospital patients are able to return to their area of origin, and that placements are not concentrated in proximity to the hospitals.

(d) The department shall develop and implement a transition plan for state employees dislocated by the reduction in state hospital population. The plan shall be tailored to the situations of individual workers and shall include strategies such as individual employment counseling through the departments of personnel and employment security; retraining and placement into other state jobs; assignment of state employees to private contractors; and assistance establishing private community services programs.

(e) For each month subsequent to the month in which a state hospital bed has been closed in accordance with (c) of this subsection, the mental health program shall transfer to the medical assistance program state funds equal to the state share of the monthly per capita expenditure amount estimated for categorically needy-disabled persons in the most recent forecast of medical assistance expenditures.

(f) The department shall report to the appropriate committees of the legislature by November 1, 2001, and by November 1, 2002, on its plans for and progress toward achieving the objectives set forth in (c) and (d) of this subsection.

(a) The health services account appropriation and $753,000 of the general fund--federal appropriation are provided solely for health care benefits for home care workers with family incomes below 200 percent of the federal poverty level who are employed through state contracts for twenty hours per week or more. Premium payments for individual provider home care workers shall be made only to the subsidized basic health plan. Home care agencies may obtain coverage either through the basic health plan or through an alternative plan with substantially equivalent benefits.

(b) $902,000 of the general fund--state appropriation for fiscal year 2002, $3,372,000 of the general fund--state appropriation for fiscal year 2003, and $4,056,000 of the general fund--federal appropriation are provided solely for community services for residents of residential habilitation centers (RHCs) who are able to be adequately cared for in community settings and who choose to live in those community settings. The department shall ensure that the average cost per day for all program services other than start-up costs shall not exceed $280. If the number and timing of residents choosing to move into community settings is not sufficient to achieve the RHC cottage consolidation plan assumed in the appropriations in subsection (2) of this section, the department shall transfer sufficient appropriations from this subsection to subsection (2) of this section to cover the added costs incurred in the RHCs. The department shall report to the appropriate committees of the legislature, within 45 days following each fiscal year quarter, the number of residents moving into community settings and the actual expenditures for all community services to support those residents.

(c) $1,440,000 of the general fund--state appropriation for fiscal year 2002, $3,041,000 of the general fund--state appropriation for fiscal year 2003, and $4,311,000 of the general fund--federal appropriation are provided solely for expanded community services for persons with developmental disabilities who also have community protection issues or are diverted or discharged from state psychiatric hospitals. The department shall ensure that the average cost per day for all program services other than start-up costs shall not exceed $275. The department shall report to the appropriate committees of the legislature, within 45 days following each fiscal year quarter, the number of persons served with these additional community services, where they were residing, what kinds of services they were
receiving prior to placement, and the actual expenditures for all community services to support these clients.

(d) $1,005,000 of the general fund--state appropriation for fiscal year 2002, $2,262,000 of the general fund--state appropriation for fiscal year 2003, and $2,588,000 of the general fund--federal appropriation are provided solely for increasing case/resource management resources to improve oversight and quality of care for persons enrolled in the medicaid home and community services waiver for persons with developmental disabilities. The department shall not increase enrollment in the waiver except for increases assumed in additional funding provided in subsections (b) and (c) of this section.

(e) $1,000,000 of the general fund--state appropriation for fiscal year 2002 and $1,000,000 of the general fund--state appropriation for fiscal year 2003 are provided solely for employment, or other day activities and training programs, for young adults with developmental disabilities who complete their high school curriculum in 2001 or 2002. These services are intended to assist with the transition to work and more independent living. Funding shall be used to the greatest extent possible for vocational rehabilitation services matched with federal funding. In recent years, the state general fund appropriation for employment and day programs has been underspent. These surpluses, built into the carry forward level budget, shall be redeployed for high school transition services.

(f) $500,000 of the general fund--state appropriation for fiscal year 2002 and $500,000 of the general fund--state appropriation for fiscal year 2003 are provided solely to expand access to family support for families below 150 percent of state median family income. This amount will provide family support services to an additional 380 families per year. This expanded family support capacity shall not be funded through the medicaid waiver. The department shall report to the fiscal committees of the legislature by December 1, 2001, recommendations for the design of a family support waiver. Recommendations shall include ways to expand access to family support while clarifying and distinguishing eligibility criteria for the existing medicaid waiver.

(g) $369,000 of the fiscal year 2002 general fund--state appropriation and $369,000 of the fiscal year 2003 general fund--state appropriation are provided solely for continuation of the autism pilot project started in 1999.

(h) $50,000 of the fiscal year 2002 general fund--state appropriation and $50,000 of the fiscal year 2003 general fund--state appropriation are
provided solely for increasing the contract amount for the southwest Washington deaf and hard of hearing services center due to increased workload.

(i) $4,049,000 of the general fund--state appropriation for fiscal year 2002, $1,734,000 of the general fund--state appropriation for fiscal year 2003, and $5,369,000 of the general fund--federal appropriation are provided solely to increase compensation by an average of fifty cents per hour for low-wage workers providing state-funded services to persons with developmental disabilities. These funds, along with funding provided for vendor rate increases, are sufficient to raise wages an average of fifty cents and cover the employer share of unemployment and social security taxes on the amount of the wage increase. In consultation with the statewide associations representing such agencies, the department shall establish a mechanism for testing the extent to which funds have been used for this purpose, and report the results to the fiscal committees of the legislature by February 1, 2002.

Premium payments for individual provider home care workers shall be made only to the subsidized basic health plan, and only for persons with incomes below 200 percent of the federal poverty level. Home care agencies may obtain coverage either through the basic health plan or through an alternative plan with substantially equivalent benefits.

(2) $1,710,000 of the general fund--state appropriation for fiscal year 2002 and $1,752,000 of the general fund--state appropriation for fiscal year 2003, plus the associated vendor rate increase for each year, are provided solely for operation of the volunteer chore services program.

For fiscal year 2003, the weighted average nursing facility payment rate shall be no more than $12.90 for the capital portion of the rate and no more than $117.45 for the noncapital portion of the rate.

(4) Adult day health services shall not be considered a duplication of services for persons receiving care in long-term care settings licensed under chapter 18.20, 72.36, or 70.128 RCW.

(5) Within funds appropriated in this section, the aging and adult services program shall coordinate with and actively support the efforts of the mental health program and of the regional support networks to provide stable community living arrangements for persons with dementia and traumatic brain injuries who have been long-term residents of the state psychiatric hospitals. The aging and adult services program shall report to the health care and fiscal committees of the legislature by November 1, 2001, and by November 1, 2002, on the actions it has taken to achieve this objective.

(6) Within funds appropriated in this section, the aging and adult services program shall devise and implement strategies in partnership with the mental health program and the regional support networks to reduce the
use of state and local psychiatric hospitals for the short-term stabilization of persons with dementia and traumatic brain injuries. Such strategies may include training and technical assistance to help long-term care providers avoid and manage behaviors which might otherwise result in psychiatric hospitalizations; monitoring long-term care facilities to assure residents are receiving appropriate mental health care and are not being inappropriately medicated or hospitalized; the development of diversion beds and stabilization support teams; and the establishment of systems to track the use of psychiatric hospitals by long-term care providers. The aging and adult services program shall report to the health care and fiscal committees of the legislature by November 1, 2001, and by November 1, 2002, on the actions it has taken to achieve this objective.

(7) In accordance with Substitute House Bill No. 1341, the department may implement two medicaid waiver programs for persons who do not qualify for such services as categorically needy, subject to federal approval and the following conditions and limitations:

(a) One waiver program shall include coverage of home-based services, and the second shall include coverage of care in community residential facilities. Enrollment in the waiver covering home-based services shall not exceed 150 persons by the end of fiscal year 2002, nor 200 persons by the end of fiscal year 2003. (b) For each month of waiver service delivered to a person who was not covered by medicaid prior to their enrollment in the waiver, the aging and adult services program shall transfer to the medical assistance program state and federal funds equal to the monthly per capita expenditure amount, net of drug rebates, estimated for medically needy-aged persons in the most recent forecast of medical assistance expenditures.

(c) The department shall identify the number of medically needy nursing home residents, and enrollment and expenditures on each of the two medically needy waivers, on monthly management reports.

(d) The department shall track and report to health care and fiscal committees of the legislature by November 15, 2002, on the types of long-term care support a sample of waiver participants were receiving prior to their enrollment in the waiver, how those services were being paid for, and an assessment of their adequacy.

(8) $50,000 of the general fund--state appropriation for fiscal year 2000 and $50,000 of the general fund--state appropriation for fiscal year

(10) From funds appropriated in this section, the department shall increase compensation for individual and for agency home care providers. Payments to individual home care providers are to be increased from $7.18 per hour to $7.68 per hour on July 1, 2001. Payments to agency providers are to be increased to $13.29 per hour on July 1, 2001, and to $13.42 per hour on July 1, 2002. All but 17 cents per hour of the July 1, 2001, increase to agency providers is to be used to increase wages for direct care workers. The appropriations in this section also include the funds needed for the employer share of unemployment and social security taxes on the amount of the wage increase required by this subsection.

In consultation with the statewide associations representing such agencies, the department shall establish a mechanism for testing the extent to which funds have been used for this purpose, and report the results to the fiscal committees of the legislature by February 1, 2002. The amounts in this subsection also include the funds needed for the employer share of unemployment and social security taxes on the amount of the wage increase.

The department shall adjust the direct care rate which would otherwise be paid to each nursing facility in accordance with chapter 74.46 RCW by an amount sufficient to accomplish this purpose. In consultation with the statewide associations representing nursing facilities, the department shall establish a mechanism for testing the extent to which funds have been used for this purpose, and report the results to the fiscal committees of the legislature by February 1, 2002.

The appropriations in this section are subject to the following conditions and limitations:
(1) Each general fund fiscal year appropriation includes such funds as are necessary to complete the school year ending in the fiscal year and for prior fiscal year adjustments.

(2) Allocations for certificated staff salaries for the 2001-02 and 2002-03 school years shall be determined using formula-generated staff units calculated pursuant to this subsection. Staff allocations for small school enrollments in (d) through (f) of this subsection shall be reduced for vocational full-time equivalent enrollments. Staff allocations for small school enrollments in grades K-6 shall be the greater of that generated under (a) of this subsection, or under (d) and (e) of this subsection. Certificated staffing allocations shall be as follows:

(a) On the basis of each 1,000 average annual full-time equivalent enrollments, excluding full-time equivalent enrollment otherwise recognized for certificated staff unit allocations under (c) through (f) of this subsection:

(i) Four certificated administrative staff units per thousand full-time equivalent students in grades K-12;

(ii) 49 certificated instructional staff units per thousand full-time equivalent students in grades K-3;

(iii) Forty-six certificated instructional staff units per thousand full-time equivalent students in grades 4-12; and

(iv) An additional 6.4 certificated instructional staff units for grades K-3 and an additional 9.4 certificated instructional staff units for grade 4. This includes 2.2 certificated instructional staff transferred from the 2000-2001 school year better schools program. Any funds allocated for the additional certificated units provided in this subsection (iv) shall not be considered as basic education funding;

(A) Funds provided under this subsection (2)(a)(iv) in excess of the amount required to maintain the statutory minimum ratio established under RCW 28A.150.260(2)(b) shall be allocated only if the district documents an actual ratio equal to or greater than 55.4 certificated instructional staff per thousand full-time equivalent students in grades K-4. For any school district documenting a lower certificated instructional staff ratio, the allocation shall be based on the district's actual grades K-4 certificated instructional staff ratio achieved in that school year, or the statutory minimum ratio established under RCW 28A.150.260(2)(b), if greater;

(B) Districts at or above 51.0 certificated instructional staff per one thousand full-time equivalent students in grades K-4 may dedicate up to 1.3 of the 55.4 funding ratio to employ additional classified instructional
assistants assigned to basic education classrooms in grades K-4. For purposes of documenting a district's staff ratio under this section, funds used by the district to employ additional classified instructional assistants shall be converted to a certificated staff equivalent and added to the district's actual certificated instructional staff ratio. Additional classified instructional assistants, for the purposes of this subsection, shall be determined using the 1989-90 school year as the base year;

(C) Any district maintaining a ratio equal to or greater than 55.4 certificated instructional staff per thousand full-time equivalent students in grades K-4 may use allocations generated under this subsection (2)(a)(iv) in excess of that required to maintain the minimum ratio established under RCW 28A.150.260(2)(b) to employ additional basic education certificated instructional staff or classified instructional assistants in grades 5-6.

Funds allocated under this subsection (2)(a)(iv) shall only be expended to reduce class size in grades K-6. No more than 1.3 of the certificated instructional funding ratio amount may be expended for provision of classified instructional assistants;

(b) For school districts with a minimum enrollment of 250 full-time equivalent students whose full-time equivalent student enrollment count in a given month exceeds the first of the month full-time equivalent enrollment count by 5 percent, an additional state allocation of 110 percent of the share that such increased enrollment would have generated had such additional full-time equivalent students been included in the normal enrollment count for that particular month;

(c)(i) On the basis of full-time equivalent enrollment in:

(A) Vocational education programs approved by the superintendent of public instruction, a maximum of 0.92 certificated instructional staff units and 0.08 certificated administrative staff units for each 19.5 full-time equivalent vocational students; and

(B) Skills center programs meeting the standards for skills center funding established in January 1999 by the superintendent of public instruction, 0.92 certificated instructional staff units and 0.08 certificated administrative units for each 16.67 full-time equivalent vocational students; and

(ii) Vocational full-time equivalent enrollment shall be reported on the same monthly basis as the enrollment for students eligible for basic support, and payments shall be adjusted for reported vocational enrollments on the same monthly basis as those adjustments for enrollment for students eligible for basic support;
(d) For districts enrolling not more than twenty-five average annual full-time equivalent students in grades K-8, and for small school plants within any school district which have been judged to be remote and necessary by the state board of education and enroll not more than twenty-five average annual full-time equivalent students in grades K-8:

(i) For those enrolling no students in grades 7 and 8, 1.76 certificated instructional staff units and 0.24 certificated administrative staff units for enrollment of not more than five students, plus one-twentieth of a certificated instructional staff unit for each additional student enrolled; and

(ii) For those enrolling students in grades 7 or 8, 1.68 certificated instructional staff units and 0.32 certificated administrative staff units for enrollment of not more than five students, plus one-tenth of a certificated instructional staff unit for each additional student enrolled;

(e) For specified enrollments in districts enrolling more than twenty-five but not more than one hundred average annual full-time equivalent students in grades K-8, and for small school plants within any school district which enroll more than twenty-five average annual full-time equivalent students in grades K-8 and have been judged to be remote and necessary by the state board of education:

(i) For enrollment of up to sixty annual average full-time equivalent students in grades K-6, 2.76 certificated instructional staff units and 0.24 certificated administrative staff units; and

(ii) For enrollment of up to twenty annual average full-time equivalent students in grades 7 and 8, 0.92 certificated instructional staff units and 0.08 certificated administrative staff units;

(f) For districts operating no more than two high schools with enrollments of less than three hundred average annual full-time equivalent students, for enrollment in grades 9-12 in each such school, other than alternative schools:

(i) For remote and necessary schools enrolling students in any grades 9-12 but no more than twenty-five average annual full-time equivalent students in grades K-12, four and one-half certificated instructional staff units and one-quarter of a certificated administrative staff unit; and

(ii) For all other small high schools under this subsection, nine certificated instructional staff units and one-half of a certificated administrative staff unit for the first sixty average annual full-time equivalent students, and additional staff units based on a ratio of 0.8732 certificated instructional staff units and 0.1268 certificated administrative staff units.
administrative staff units per each additional forty-three and one-half average annual full time equivalent students.

Units calculated under (f)(ii) of this subsection shall be reduced by certificated staff units at the rate of forty-six certificated instructional staff units and four certificated administrative staff units per thousand vocational full-time equivalent students.

(g) For each nonhigh school district having an enrollment of more than seventy annual average full-time equivalent students and less than one hundred eighty students, operating a grades K-8 program or a grades 1-8 program, an additional one-half of a certificated instructional staff unit; and

(h) For each nonhigh school district having an enrollment of more than fifty annual average full-time equivalent students and less than one hundred eighty students, operating a grades K-6 program or a grades 1-6 program, an additional one-half of a certificated instructional staff unit.

(3) Allocations for classified salaries for the 2001-02 and 2002-03 school years shall be calculated using formula-generated classified staff units determined as follows:

(a) For enrollments generating certificated staff unit allocations under subsection (2)(d) through (h) of this section, one classified staff unit for each three certificated staff units allocated under such subsections;

(b) For all other enrollment in grades K-12, including vocational full-time equivalent enrollments, one classified staff unit for each sixty average annual full-time equivalent students; and

(c) For each nonhigh school district with an enrollment of more than fifty annual average full-time equivalent students and less than one hundred eighty students, an additional one-half of a classified staff unit.

(4) Fringe benefit allocations shall be calculated at a rate of 11.37 percent in the 2001-02 school year and 11.37 percent in the 2002-03 school year for certificated salary allocations provided under subsection (2) of this section, and a rate of 12.96 percent in the 2001-02 school year and 12.96 percent in the 2002-03 school year for classified salary allocations provided under subsection (3) of this section.

(5) Insurance benefit allocations shall be calculated at the maintenance rate specified in section 504(3) of this act, based on the number of benefit units determined as follows:

(a) The number of certificated staff units determined in subsection (2) of this section; and
(b) The number of classified staff units determined in subsection (3) of this section multiplied by 1.152. This factor is intended to adjust allocations so that, for the purposes of distributing insurance benefits, full-time equivalent classified employees may be calculated on the basis of 1440 hours of work per year, with no individual employee counted as more than one full-time equivalent.

(6)(a) For nonemployee-related costs associated with each certificated staff unit allocated under subsection (2)(a), (b), and (d) through (h) of this section, there shall be provided a maximum of $8,519 per certificated staff unit in the 2001-02 school year and a maximum of $8,715 per certificated staff unit in the 2002-03 school year.

(b) For nonemployee-related costs associated with each vocational certificated staff unit allocated under subsection (2)(c)(i)(A) of this section, there shall be provided a maximum of $20,920 per certificated staff unit in the 2001-02 school year and a maximum of $21,401 per certificated staff unit in the 2002-03 school year.

(c) For nonemployee-related costs associated with each vocational certificated staff unit allocated under subsection (2)(c)(i)(B) of this section, there shall be provided a maximum of $16,233 per certificated staff unit in the 2001-02 school year and a maximum of $16,606 per certificated staff unit in the 2002-03 school year.

(7) Allocations for substitute costs for classroom teachers shall be distributed at a maintenance rate of $494.34 for the 2001-02 and 2002-03 school years per allocated classroom teachers exclusive of salary increase amounts provided in section 504 of this act. Solely for the purposes of this subsection, allocated classroom teachers shall be equal to the number of certificated instructional staff units allocated under subsection (2) of this section, multiplied by the ratio between the number of actual basic education certificated teachers and the number of actual basic education certificated instructional staff reported statewide for the prior school year.

(8) Any school district board of directors may petition the superintendent of public instruction by submission of a resolution adopted in a public meeting to reduce or delay any portion of its basic education allocation for any school year. The superintendent of public instruction shall approve such reduction or delay if it does not impair the district's financial condition. Any delay shall not be for more than two school years. Any reduction or delay shall have no impact on levy authority pursuant to RCW 84.52.0531 and local effort assistance pursuant to chapter 28A.500 RCW.
The superintendent may distribute a maximum of $6,510,000 outside the basic education formula during fiscal years 2002 and 2003 as follows:

(a) For fire protection for school districts located in a fire protection district as now or hereafter established pursuant to chapter 52.04 RCW, a maximum of $480,000 may be expended in fiscal year 2002 and a maximum of $491,000 may be expended in fiscal year 2003;
(b) For summer vocational programs at skills centers, a maximum of $2,098,000 may be expended each fiscal year;
(c) A maximum of $343,000 may be expended for school district emergencies; and
(d) A maximum of $500,000 per fiscal year may be expended for programs providing skills training for secondary students who are enrolled in extended day school-to-work programs, as approved by the superintendent of public instruction. The funds shall be allocated at a rate not to exceed $500 per full-time equivalent student enrolled in those programs.

For purposes of RCW 84.52.0531, the increase per full-time equivalent student in state basic education appropriations provided under this act, including appropriations for salary and benefits increases, is 2.5 percent from the 2000-01 school year to the 2001-02 school year, and 3.3 percent from the 2000-01 school year to the 2002-03 school year.

If two or more school districts consolidate and each district was receiving additional basic education formula staff units pursuant to subsection (2)(b) through (h) of this section, the following shall apply:
(a) For three school years following consolidation, the number of basic education formula staff units shall not be less than the number of basic education formula staff units received by the districts in the school year prior to the consolidation; and
(b) For the fourth through eighth school years following consolidation, the difference between the basic education formula staff units received by the districts for the school year prior to consolidation and the basic education formula staff units after consolidation pursuant to subsection (2)(a) through (h) of this section shall be reduced in increments of twenty percent per year.

NEW SECTION. Sec. 503. FOR THE SUPERINTENDENT OF PUBLIC INSTRUCTION--BASIC EDUCATION EMPLOYEE COMPENSATION. (1) The following calculations determine the salaries used in the general fund allocations for certificated instructional, certificated administrative, and classified staff units under section 502 of this act:
(a) Salary allocations for certificated instructional staff units shall be determined for each district by multiplying the district's certificated instructional total base salary shown on LEAP Document 12E for the appropriate year, by the district's average staff mix factor for basic education and special education certificated instructional staff in that school year, computed using LEAP Document 1S; and

(b) Salary allocations for certificated administrative staff units and classified staff units for each district shall be based on the district's certificated administrative and classified salary allocation amounts shown on LEAP Document 12E for the appropriate year.

(2) For the purposes of this section:

(a) "Basic education certificated instructional staff" is defined as provided in RCW 28A.150.100 and "special education certificated staff" means staff assigned to the state-supported special education program pursuant to chapter 28A.155 RCW in positions requiring a certificate;

(b) "LEAP Document 1S" means the computerized tabulation establishing staff mix factors for certificated instructional staff according to education and years of experience, as developed by the legislative evaluation and accountability program committee on March 25, 1999, at 16:55 hours; and

(c) "LEAP Document 12E" means the computerized tabulation of 2001-02 and 2002-03 school year salary allocations for certificated administrative staff and classified staff and derived and total base salaries for certificated instructional staff as developed by the legislative evaluation and accountability program committee on March 13, 2001, at 16:32 hours.

(3) Incremental fringe benefit factors shall be applied to salary adjustments at a rate of 10.73 percent for school years 2001-02 and 2002-03 for certificated staff and 9.46 percent for school years 2001-02 and 2002-03 for classified staff.

(4)(a) Pursuant to RCW 28A.150.410, the following state-wide salary allocation schedules for certificated instructional staff are established for basic education salary allocations:

(i) Credits earned since receiving the masters degree; and

(ii) Any credits in excess of forty-five credits that were earned after the baccalaureate degree but before the masters degree.

(5) For the purposes of this section:

(a) "BA" means a baccalaureate degree.

NEW SECTION. Sec. 507. FOR THE SUPERINTENDENT OF PUBLIC INSTRUCTION--

FOR SPECIAL EDUCATION PROGRAMS

General Fund--State Appropriation (FY 2002) .. $ 421,040,000
General Fund--State Appropriation (FY 2003) .. $ 420,665,000
General Fund--Federal Appropriation .. $ 256,092,000
TOTAL APPROPRIATION .. $ 1,097,797,000

The appropriations in this section are subject to the following conditions and limitations:

(1) Funding for special education programs is provided on an excess cost basis, pursuant to RCW 28A.150.390. School districts shall ensure that special education students as a class receive their full share of the general apportionment allocation accruing through sections 502 and 504 of this act. To the extent a school district cannot provide an appropriate education for special education students under chapter 28A.155 RCW through the general apportionment allocation, it shall provide services through the special education excess cost allocation funded in this section.

(2) Effective with the 2001-02 school year, the superintendent shall change the S-275 personnel reporting system to ensure that: Special education students are basic education students first and as a class are entitled to the full basic education allocation; and that they are basic education students for the entire school day.

(3) Each general fund--state fiscal year appropriation includes such funds as are necessary to complete the school year ending in the fiscal year and for prior fiscal year adjustments.

(4) The superintendent of public instruction shall distribute state funds to school districts based on two categories: The optional birth through age two program for special education eligible developmentally delayed infants and toddlers, and the mandatory special education program for special education eligible students ages three to twenty-one. A "special education eligible student" means a student receiving specially
designed instruction in accordance with a properly formulated individualized education program.

(5) (a) For the 2001-02 and 2002-03 school years, the superintendent shall distribute state funds to each district based on the sum of:

(i) A district's annual average headcount enrollment of developmentally delayed infants and toddlers ages birth through two, multiplied by the district's average basic education allocation per full-time equivalent student, multiplied by 1.15; and

(ii) A district's annual average full-time equivalent basic education enrollment multiplied by the funded enrollment percent determined pursuant to subsection (6)(c) of this section, multiplied by the district's average basic education allocation per full-time equivalent student multiplied by 0.9309.

(b) For purposes of this subsection, "average basic education allocation per full-time equivalent student" for a district shall be based on the staffing ratios required by RCW 28A.150.260 and shall not include enhancements, secondary vocational education, or small schools.

(6) The definitions in this subsection apply throughout this section.

(a) "Annual average full-time equivalent basic education enrollment" means the resident enrollment including students enrolled through choice (RCW 28A.225.225) and students from nonhigh districts (RCW 28A.225.210) and excluding students residing in another district enrolled as part of an interdistrict cooperative program (RCW 28A.225.250).

(b) "Enrollment percent" means the district's resident special education annual average enrollment, excluding the birth through age two enrollment, as a percent of the district's annual average full-time equivalent basic education enrollment. For the 2001-02 and the 2002-03 school years, each district's funded enrollment percent shall be the lesser of the district's actual enrollment percent for the school year for which the allocation is being determined or 13.0 percent.

(7) At the request of any interdistrict cooperative of at least 15 districts in which all excess cost services for special education students of the districts are provided by the cooperative, the maximum enrollment percent shall be 13.0, and shall be calculated in the aggregate rather than individual district units. For purposes of this subsection, the average basic education allocation per full-time equivalent student shall be calculated in the aggregate rather than individual district units.

(8) A maximum of $10,784,000 of the general fund--state appropriation for fiscal year 2002 and a maximum of $10,623,000 of the general fund--state
appropriation for fiscal year 2003 are provided as safety net funding for districts with demonstrated needs for state special education funding beyond the amounts provided in subsection (5) of this section. Safety net funding shall be awarded by the state safety net oversight committee.

(a) The safety net oversight committee shall first consider the needs of districts adversely affected by the 1995 change in the special education funding formula. Awards shall be based on the lesser of the amount required to maintain the 1994-95 state special education excess cost allocation to the school district in aggregate or on a dollar per funded student basis.

(b) The committee shall then consider unmet needs for districts that can convincingly demonstrate that all legitimate expenditures for special education exceed all available revenues from state funding formulas. In the determination of need, the committee shall also consider additional available revenues from federal and local sources. Differences in program costs attributable to district philosophy, service delivery choice, or accounting practices are not a legitimate basis for safety net awards.

(c) The maximum allowable indirect cost for calculating safety net eligibility may not exceed the federal restricted indirect cost rate for the district plus one percent.

(d) Safety net awards shall be adjusted based on the percent of potential medicaid eligible students billed as calculated by the superintendent in accordance with chapter 318, Laws of 1999.

(e) Safety net awards must be adjusted for any audit findings or exceptions related to special education funding.

(f) The superintendent may expend up to $120,000 per year of the amounts provided in this subsection to provide staff assistance to the committee in analyzing applications for safety net funds received by the committee.

(9) The superintendent of public instruction may adopt such rules and procedures as are necessary to administer the special education funding and safety net award process. Prior to revising any standards, procedures, or rules, the superintendent shall consult with the office of financial management and the fiscal committees of the legislature.

(10) The safety net oversight committee appointed by the superintendent of public instruction shall consist of:

(a) One staff from the office of superintendent of public instruction;

(b) Staff of the office of the state auditor;

(c) Staff of the office of the financial management; and
(d) One or more representatives from school districts or educational service districts knowledgeable of special education programs and funding.

(11) To the extent necessary, $5,500,000 of the general fund--federal appropriation shall be expended for safety net funding to meet the extraordinary needs of one or more individual special education students. If safety net awards to meet the extraordinary needs exceed $5,500,000 of the general fund--federal appropriation, the superintendent shall expend all available federal discretionary funds necessary to meet this need. General fund--state funds shall not be expended for this purpose.

(12) A maximum of $678,000 may be expended from the general fund--state appropriations to fund 5.43 full-time equivalent teachers and 2.1 full-time equivalent aides at children's orthopedic hospital and medical center. This amount is in lieu of money provided through the home and hospital allocation and the special education program.

(13) $1,000,000 of the general fund--federal appropriation is provided for projects to provide special education students with appropriate job and independent living skills, including work experience where possible, to facilitate their successful transition out of the public school system. The funds provided by this subsection shall be from federal discretionary grants.

(14) The superintendent shall maintain the percentage of federal flow-through to school districts at 85 percent. In addition to other purposes, school districts may use increased federal funds for high-cost students, for purchasing regional special education services from educational service districts, and for staff development activities particularly relating to inclusion issues.

(15) A maximum of $1,200,000 of the general fund--federal appropriation may be expended by the superintendent for projects related to use of inclusion strategies by school districts for provision of special education services. The superintendent shall prepare an information database on laws, best practices, examples of programs, and recommended resources. The information may be disseminated in a variety of ways, including workshops and other staff development activities.

(16) A school district may carry over from one year to the next year up to 10 percent of general fund--state funds allocated under this program; however, carry over funds shall be expended in the special education program.

NEW SECTION. Sec. 902. INFORMATION SYSTEMS PROJECTS. Agencies shall comply with the following requirements regarding information systems projects when specifically directed to do so by this act.

(1) Agency planning and decisions concerning information technology shall be made in the context of its information technology portfolio. "Information technology portfolio" means a strategic management approach in which the relationships between agency missions and information technology investments can be seen and understood, such that: Technology efforts are linked to agency objectives and business plans; the impact of new investments on existing infrastructure and business functions are assessed and understood before implementation; and agency activities are consistent with the development of an integrated, nonduplicative statewide infrastructure.

(2) Agencies shall use their information technology portfolios in making decisions on matters related to the following:
   (a) System refurbishment, acquisitions, and development efforts;
   (b) Setting goals and objectives for using information technology in meeting legislatively-mandated missions and business needs;
   (c) Assessment of overall information processing performance, resources, and capabilities;
   (d) Ensuring appropriate transfer of technological expertise for the operation of any new systems developed using external resources; and
   (e) Progress toward enabling electronic access to public information.

(3) Each project will be planned and designed to take optimal advantage of Internet technologies and protocols. Agencies shall ensure that the
project is in compliance with the architecture, infrastructure, principles, policies, and standards of digital government as maintained by the information services board.

(4) The agency shall produce a feasibility study for information technology projects at the direction of the information services board and in accordance with published department of information services policies and guidelines. At a minimum, such studies shall include a statement of: (a) The purpose or impetus for change; (b) the business value to the agency, including an examination and evaluation of benefits, advantages, and cost; (c) a comprehensive risk assessment based on the proposed project's impact on both citizens and state operations, its visibility, and the consequences of doing nothing; (d) the impact on agency and statewide information infrastructure; and (e) the impact of the proposed enhancements to an agency's information technology capabilities on meeting service delivery demands.

(5) The agency shall produce a comprehensive management plan for each project. The plan or plans shall address all factors critical to successful completion of each project. The plan(s) shall include, but is not limited to, the following elements: A description of the problem or opportunity that the information technology project is intended to address; a statement of project objectives and assumptions; a definition and schedule of phases, tasks, and activities to be accomplished; and the estimated cost of each phase. The planning for the phased approach shall be such that the business case justification for a project needs to demonstrate how the project recovers cost or adds measurable value or positive cost benefit to the agency's business functions within each development cycle.

(6) The agency shall produce quality assurance plans for information technology projects. Consistent with the direction of the information services board and the published policies and guidelines of the department of information services, the quality assurance plan shall address all factors critical to successful completion of the project and successful integration with the agency and state information technology infrastructure. At a minimum, quality assurance plans shall provide time and budget benchmarks against which project progress can be measured, a specification of quality assurance responsibilities, and a statement of reporting requirements. The quality assurance plans shall set out the functionality requirements for each phase of a project.

(7) A copy of each feasibility study, project management plan, and quality assurance plan shall be provided to the department of information services...
services, the office of financial management, and legislative fiscal committees. The plans and studies shall demonstrate a sound business case that justifies the investment of taxpayer funds on any new project, an assessment of the impact of the proposed system on the existing information technology infrastructure, the disciplined use of preventative measures to mitigate risk, and the leveraging of private-sector expertise as needed. Authority to expend any funds for individual information systems projects is conditioned on the approval of the relevant feasibility study, project management plan, and quality assurance plan by the department of information services and the office of financial management.
