Drinking Water Assistance Account (04-4-002)
The reappropriations in this section are subject to the following
conditions and limitations:
(1) Expenditures of the reappropriation must comply with RCW
70.119A.170.
(2)(a) The state building construction account reappropriation is
provided solely to provide assistance to counties, cities, and special
purpose districts to identify, acquire, and rehabilitate public water
systems that have water quality problems or have been allowed to
deteriorate to a point where public health is an issue. Eligibility is
confined to applicants that already own at least one group A public
water system and that demonstrate a track record of sound drinking
water utility management. Funds may be used for: Planning, design,
and other preconstruction activities; system acquisition; and capital
construction costs.
(b) The state building construction account reappropriation must be
jointly administered by the department of health, the public works
board, and the department of community, trade, and economic development
using the drinking water state revolving fund loan program as an
administrative model. In order to expedite the use of these funds and
minimize administration costs, this reappropriation must be
administered by guidance, rather than rule. Projects must generally be
prioritized using the drinking water state revolving fund loan program
criteria. All financing provided through this program must be in the
form of grants that must partially cover project costs. The maximum
grant to any eligible entity may not exceed twenty-five percent of the
funds allocated to the appropriation in section 201, chapter 277, Laws
of 2004.

NEW SECTION.  Sec. 148.  FOR THE DEPARTMENT OF GENERAL ADMINISTRATION

Engineering and Architectural Services (06-2-012)

The appropriations in this section are subject to the following conditions and limitations:

(1) The appropriations shall be used to provide project management services to state agencies as required by RCW 43.19.450 that are essential and mandated activities defined as core services and are included in the engineering and architectural services' responsibilities and task list for general public works projects of normal complexity. The general public works projects included are all those financed by the state capital budget for the biennium ending June 30, 2007, with individual total project values up to $20,000,000.

(2) The community and technical capital projects account shall be used to provide services to six community and technical colleges projects that require separate reimbursable project management agreements.

(3) The department may negotiate agreements with agencies for additional fees to manage projects financed by financial contracts,
other alternative financing, projects with a total value greater than
$20,000,000, or for the nonstate funded portion of projects with mixed
funding sources.

(4) The department shall review each community and technical
college request and the requests of other client agencies for funding
any project over $2,500,000 for inclusion in the 2006 supplemental
capital budget and the 2007-09 capital budget to ensure that the amount
requested by the agency is appropriate for predesign, design, and
construction, depending on the phase of the project being requested.
The department shall pay particular attention:  (a) That the budgeted
amount requested is at an appropriate level for the various components
that make up the cost of the project such as project management; and
(b) that standard measurements such as cost per square foot are
reasonable. The department shall also assist the office of financial
management with review of other agency projects as requested.

General Administration Building Rehabilitation (06-1-002)

The appropriation in this section is subject to the following
conditions and limitations: Funding is provided for the predesign for
replacement or renovation of the general administration building
combined with the development of an office building on the block
adjoning Capital Way and 11th avenue. The combined development is
intended to provide: (1) Executive office space for statewide elected officials; (2) public access space for portions of the state library collection and historically significant documents from the state archives and the state historical museum; and (3) high density general office space that can adapt to changing state needs. The project will maximize interagency sharing of support services such as information technology, printing and mailing, management and storage of supplies, reception areas, and other common functions. The project will also include sufficient parking to provide a net increase in parking spaces beyond what is required for the new office space. The project shall also include leasable ground floor retail space on Capital Way. The department shall consult with statewide elected officials and the city of Olympia in developing the predesign.

Coyote Ridge Corrections Center: Expansion (98-2-011)

The appropriation in this section is subject to the following conditions and limitations:
(1) $179,000,000 is provided solely to design and construct a 1,280 bed medium-security prison at Coyote Ridge corrections center in Connell.
(2) The facility shall be a publicly-owned and operated facility.
(3) The new facility shall include at least 512 hybrid-security beds that have a lower cost to construct than conventional medium security beds but still maintain a medium security perimeter.
(4) Design of the facility shall incorporate efficiencies in administrative space and support services realized by sharing services within the region. The department shall examine other states' and private industry standard designs, and report on how efficiencies will be incorporated into the design of the facility to the office of financial management and to legislative fiscal staff not later than September 1, 2005. Nothing in this subsection requires the department to adopt design parameters that would endanger public safety or generate increased operating costs.
(5) Once opened, a portion of the new facility shall be used to alleviate the crowded conditions in reception at the Washington corrections center in Shelton.

Water Irrigation Efficiencies (01-H-010)

The reappropriations in this section are subject to the following
conditions and limitations:

(1) The reappropriations are provided solely to provide grants to
conservation districts to assist the agricultural community to
implement water conservation measures and irrigation efficiencies in
the 16 critical basins. A conservation district receiving funds shall
manage each grant to ensure that a portion of the water saved by the
water conservation measure or irrigation efficiency will be placed as
a purchase or a lease in the trust water rights program to enhance
instream flows. The proportion of saved water placed in the trust
water rights program must be equal to the percentage of the public
investment in the conservation measure or irrigation efficiency. The
percentage of the public investment may not exceed 85 percent of the
total cost of the conservation measure or irrigation efficiency. In
awarding grants, a conservation district shall give first priority to
family farms.

(2) $344,000 of the water quality account reappropriation is
provided for water leases or projects in the Yakima river basin for
aquifer recharge necessary to allow the use of drought wells to meet
essential irrigation needs. Essential irrigation needs is defined as
eighty percent of the water a farmer would ordinarily receive from the irrigation district, less the water that is actually delivered and regardless of crops grown.

Water Supply Facilities (04-4-006)

The reappropriations in this section are subject to the following conditions and limitations:

(1)(a) $541,951 of the state building construction account reappropriation and $1,733,812 of the state and local improvements revolving account reappropriation are provided solely for expenditure under a contract between the department of ecology and the United States bureau of reclamation for the development of plans, engineering, and financing reports and other preconstruction activities associated with the development of water storage projects in the Yakima river basin, consistent with the Yakima river basin water enhancement project, P.L. 103-434. The initial water storage feasibility study shall be for the Black Rock reservoir project. The department shall seek federal funds to augment the funding provided by this appropriation.

(b) Up to $2,240,000 of the state building construction account--state reappropriation is provided solely for phase 1 of restoration of anadromous fish habitat in Manastash creek.

(c) The remainder of the state building construction account reappropriation is provided solely for grants for the development of plans, engineering and financing reports, acquiring land and facilities, and other preconstruction activities associated with the development of water storage and groundwater storage and recovery projects. Proposed projects must be consistent with the recommendations of the water storage task force and the governor's water strategy. Priority for the use of these funds must be given to: Projects that have been identified for early action through watershed plans, comprehensive irrigation district management plans, or similar plans; to projects that are part of an approved habitat conservation plan or other intergovernmental agreement; or to joint projects with federal entities such as the bureau of reclamation. The department shall develop and administer this grants program in conjunction with the departments of agriculture and fish and wildlife. Decisions regarding which projects are funded must be by unanimous agreement of all three departments. The department shall seek local and federal funds to augment the funding provided by this reappropriation.
In addition to the annual project progress reporting requirement of RCW 43.88.160(3), the department shall file quarterly project progress reports with the office of financial management.

Water Conveyance Infrastructure Projects (05-2-850)

The reappropriations in this section are subject to the following conditions and limitations:
(1) $1,500,000 of the state building construction account—state appropriation is provided solely for water conveyance facilities to implement the 1996 memorandum of agreement regarding utilization of Skagit river basin water resources for in-stream and out-of-stream purposes.

(2) $300,000 of the state and local improvements revolving account—state appropriation is provided solely for the Bertrand watershed improvement district to address unpermitted water use and environmental compliance and fund early action planning, feasibility studies, and construction of early action projects.

(3) $1,600,000 of the state building construction account—state appropriation is provided solely for the Middle Fork Nooksack river water diversion system.

(4) First priority from the remaining appropriation, $1,475,000 from the state and local improvements revolving account—state appropriation, $350,000 from the state building construction account—state appropriation, and the water quality account—state appropriation, shall be the following projects: Piping in the upper Yakima river; piping for Bull canal; piping for the Lowden number 2 ditch; diversion reconstruction and piping in Beaver creek; conjunctive use of surface and ground water in the Chewuch river; replacing surface diversions with wells and consolidation of diversions in the Entiat river; replacing a check dam with a siphon on Little Naneum creek; consolidate diversions on Simcoe creek; and ground water recharge of reclaimed water on Kitsap peninsula. The purpose of this funding is to develop projects and take other water management actions that benefit streamflows and enhance water supply to resolve conflicts among water needs for municipal water supply, agricultural water supply, and fish restoration. The streamflow or other public benefits secured from these projects should be commensurate with the investment of state funds.

(5) $50,000 of the state building construction account—state reappropriation is provided solely for Ahtanum creek watershed restoration and Pine Hollow reservoir, provided there is agreement among the Yakama nation, Ahtanum irrigation district, and other jurisdictional federal, state, and local agencies and entities to proceed with the environmental impact statement.

(2) $5,000,000 of the state building construction account--state appropriation is provided solely for water quality grants for hardship communities with a population of less than 5,000. The department shall give priority consideration to: (a) Communities subject to a regulatory order from the department of ecology for noncompliance with water quality rules; (b) projects for which design work has been completed; and (c) projects with a local match from reasonable water quality rates and charges.

(3) $1,000,000 of the state building construction account--state appropriation is provided to design appropriate wastewater treatment facilities to serve the Hoodsport to Skokomish reservation areas of Hood Canal. The exact facilities will be based upon the recommendations from an analysis of wastewater management options for the Hoodsport to Skokomish river currently being undertaken by Mason county.

(4) $320,000 of the water quality account--state appropriation is provided to Mason county to develop a septic system data base and identify failing septic systems in Hood Canal.

(5) $70,000 of the water quality account--state appropriation will be provided to Kitsap county for surveys of septic systems in Hood Canal.
(6) $70,000 of the water quality account--state appropriation will be provided to Jefferson county for surveys of septic systems in Hood Canal.

NEW SECTION.  Sec. 326. FOR THE DEPARTMENT OF ECOLOGY
State Drought Preparedness (05-4-009)
The reappropriation in this section is subject to the following conditions and limitations:

(1) The reappropriation in this section is provided solely for response to the statewide drought that was declared pursuant to chapter 43.83B RCW. The department of ecology may provide funding or compensation for purchase or lease of water rights and to public bodies as defined in RCW 43.83B.050 in connection with projects and measures designed to alleviate drought conditions which may affect: Public health and safety; drinking water supplies; agricultural activities; or fish and wildlife survival.

(2) Projects or measures for which funding or compensation will be provided must be connected with a water system, water source, or water body which is receiving, or has been projected to receive, less than seventy-five percent of normal water supply, as the result of natural drought conditions. This reduction in water supply must be such that it is causing, or will cause, undue hardship for the entities or fish or wildlife depending on the water supply. General criteria for guidelines to be established by the department of ecology for distribution of funds must include: A balanced and equitable distribution of the funds among the different sectors affected by drought; a funding process that ensures funds are available for drought impacts that arise both early and later during the course of the drought; and preference for projects that leverage other federal and local funds.

Local Toxics Grants for Cleanup and Prevention (06-4-008)

The appropriation in this section is subject to the following conditions and limitations:

(1) $6,000,000 of the appropriation is provided solely for grants to local governments for local projects that implement the state "beyond waste" plan. Grant funds will emphasize additional organics
composting and conversion, green building, and moderate risk waste projects described in the plan. Of this amount, up to $1,600,000 may be used for one-time funding for auto switch recycling consistent with the memorandum of agreement being finalized with the auto recyclers association.

(2) $3,000,000 of the appropriation is provided for emission reduction projects for local governments to retrofit public sector diesel engines with exhaust emission control devices or to make other modifications or operational changes, including cleaner fuels, to allow public sector fleets to reduce their emissions.

(3) $5,000,000 of the appropriation is provided solely for grants to local governments needing assistance in complying with the new phase II storm water permit requirements.

Watershed Plan Implementation and Flow Achievement (06-2-003)
The appropriation in this section is subject to the following conditions and limitations: $16,000,000 of the appropriation is provided solely for projects and water right acquisitions to support watershed planning efforts and achieving instream flows subject to the following project types, conditions, and limitations:
(1) Up to $1,353,172 of the appropriation is provided to improve irrigation efficiency and to achieve associated flow improvements in the Twisp and Methow rivers by providing for cleaning and piping of
30,943 linear feet of the irrigation canal within the lower (downstream) seven miles of the Methow Valley irrigation district's west canal. Of this amount, up to $100,000 is provided for a neutral independent consultant to provide management assistance to the Methow Valley irrigation district for purposes of identifying structural and operational improvements to increase overall system water use efficiency.

(2) Up to $200,000 of the appropriation is provided for a portion of the costs of the project level environmental impact statement for the Ahtanum creek watershed restoration program, including construction of the Pine Hollow reservoir, provided there is agreement among the Yakama nation, Ahtanum irrigation district, and other jurisdictional federal, state, and local agencies and entities to proceed with the environmental impact statement.

(3) Up to $75,000 of the appropriation is provided to formalize the Ahtanum creek watershed restoration program, including identification of site specific habitat improvement projects and determination of the most appropriate restoration program alternative to implement.

(4) Water storage grants for the development of plans, engineering and financing reports, acquiring lands and facilities, and other preconstruction activities associated with the development of water storage and groundwater storage and recovery projects. Proposed projects should be consistent with the recommendations of the water storage task force. The department of ecology would issue grants in consultation with the departments of agriculture and fish and wildlife.

(5) Infrastructure improvement projects and other water management actions that benefit stream flows and enhance water supply to resolve conflicts among water needs for municipal water supply, agriculture water supply, and fish restoration. The stream flow improvements and other public benefits secured from these projects should be commensurate with the investment of state funds.

(6) Projects for planning, acquisition, construction, and improvement of agriculture water supply facilities and achieving water conservation and water use efficiency improvements.

(7) Financial assistance to purchase and install water measuring devices at points of diversion and withdrawal. Preference would be given to fish-critical basins, to areas participating in the department
of fish and wildlife fish screening and cooperative compliance programs, and to basins where watershed planning has determined additional water diversion and withdrawal information is needed.

(8) Funding for acquisition of either water or water rights, or both, for instream flow achievement and establishment of water accounts. The appropriation is provided for either the purchase or lease, or both, of water rights. It is also provided for the purpose of improving stream and river flows in fish critical basins under the trust water rights program under chapters 90.42 and 90.38 RCW.

**NEW SECTION.  Sec. 453. FOR THE DEPARTMENT OF NATURAL RESOURCES**

Trust Land Transfer (06-2-012)

The state building construction account--state appropriation in this section is subject to the following conditions and limitations:

(1) The total appropriation is provided solely for the lease of certain parcels of state trust lands so that these lands may be used for multiple public purposes. The lease payments described in subsection (2) of this section shall fully compensate trust
beneficiaries for a leasehold interest of ninety-nine years. It is the intent of the legislature that these long-term leases will allow for management of these trust lands for multiple public use and benefit as specified in subsection (3) of this section.

(2) The department shall calculate full fair market compensation for a leasehold interest of a term of ninety-nine years using simplified appraisal processes that minimize the administrative costs of calculating full fair market compensation while ensuring that the beneficiaries are appropriately compensated. The leasehold interest includes all rights to manage the lands consistent with the standards under subsection (3) of this section including the sale of valuable materials and allowance of uses that derive monetary returns from the lands. It is the intent of the legislature that because the beneficiaries are largely supported by state funds not derived from these granted lands, the added costs of detailed, parcel-specific appraisals, may not justify the added precision of such appraisals. The lease agreements must include the right for automatic renewal, and must specify that the calculation of full fair market compensation for renewed leases must ensure that the value of the resources on the land that were used to compensate beneficiaries in the initial lease shall not become a part of the calculation for compensation for the renewed lease.

(3)(a) The granted lands placed in the state granted lands lease program must be managed by the department under existing management statutes, policies, and agreements to the extent not inconsistent with the management criteria of this section. The valuable materials on the granted lands may be sold in the same manner and for the same purposes as is authorized for state lands, and charges may be made for recreational or other uses of the lands.

(b) The multiple use lands in the granted lands lease program must be managed considering the economic and environmental aspects of various systems of renewable resource management, including: Silviculture and protection of forest resources; providing for outdoor recreation, range, timber, watershed, wildlife, and fish; providing for a diversity of plant and animal communities; and providing for protection of streams, streambanks, shorelines, lakes, wetlands, and other bodies of water from detrimental changes in chemical, biological, or hydrological characteristics.
(4) All reasonable costs incurred by the department to implement this section are authorized to be paid out of this appropriation. Authorized costs include the actual cost of appraisals, staff time, environmental reviews, surveys, and other similar costs. These administrative costs shall not exceed one and one-half percent of the total appropriation. No deduction shall be made for the resource management cost account under RCW 79.64.040. The department and receiving agencies shall work in good faith to carry out the intent of this section. However, the department or receiving agencies may remove a property from the transfer list based on new, substantive information, if it is determined that transfer of the lease of the property is not compatible with the intent of this section or in the interest of the receiving agency. On June 30, 2007, the state treasurer shall transfer all remaining uncommitted funds from this appropriation to the common school construction fund and the appropriation in this section shall be reduced by an equivalent amount. The appropriation in this section is provided for a list of projects in LEAP capital document No. 2005-53, as developed on March 27, 2005.

(06-1-750)

The appropriation in this section is subject to the following
conditions and limitations:
(1) Pursuant to definitions and provisions in section 925, chapter
26, Laws of 2003 1st sp. sess., the appropriation is provided solely to
maintain facilities housing educational and general programs and to
maintain its major building systems and campus infrastructure.
Building maintenance, mechanical adjustments, repairs, and minor works
for the facility or its major building systems and campus
infrastructure must extend the remaining useful life of the facility or
keep it safe and functioning normally.
(2) With this appropriation, the intent is to improve the average condition of state facilities as compared to the baseline conditions documented in report 03-1 of the joint legislative audit and review committee. Preventive facility maintenance project funds shall be allocated at local discretion to achieve the above stated performance goal, with particular attention given to buildings currently rated in superior to adequate condition so as to maximize useful life given both the passage of time and intensity with which the space is used.

(3) Section 915 of this act does not apply to this appropriation.

Preventive Facility Maintenance and Building System Repairs (06-1-750)

The appropriation in this section is subject to the following conditions and limitations:
(1) Pursuant to definitions and provisions in section 925, chapter 26, Laws of 2003 1st sp. sess., the appropriation is provided solely to maintain facilities housing educational and general programs and to maintain its major building systems and campus infrastructure. Building maintenance, mechanical adjustments, repairs, and minor works for the facility or its major building systems and campus
infrastructure must extend the remaining useful life of the facility or keep it safe and functioning normally.

(2) With this appropriation, the intent is to improve the average condition of state facilities as compared to the baseline conditions documented in report 03-1 of the joint legislative audit and review committee. Preventive facility maintenance project funds shall be allocated at local discretion to achieve the above stated performance goal, with particular attention given to buildings currently rated in superior to adequate condition so as to maximize useful life given both the passage of time and intensity with which the space is used.

(3) Section 915 of this act does not apply to this appropriation.

Snohomish, Skagit, and Island County Higher Education Needs Assessment (06-2-950)

The appropriation in this section is subject to the following conditions and limitations:
(1) The Washington state institute for public policy (institute) is directed to assess the higher education needs in Snohomish, Skagit, and Island counties and recommend to the legislature solutions to the higher education needs. Solutions that the institute should consider, include, but should not be limited to, establishment of new institutions, expansion of existing institutions, and colocation of institutions. In conducting its assessment, the institute shall take into account but not be limited to the following: Population growth, higher education participation rates, economic demand and work force needs, and drive and commute times to existing higher education institutions.

(2) The institute may contract for an assessment of sites to meet higher education needs in the counties.

(3) In conducting the assessment and siting study, the institute shall consult with the higher education coordinating board, the state board for community and technical colleges, the work force training and coordinating board, the North Snohomish, Island, and Skagit higher education consortium, and the existing research and comprehensive institutions.

(4) The advisory committee on higher education created pursuant to chapter . . . (Engrossed Second Substitute Senate Bill No. 5441 (studying early learning, K-12 and higher education)), Laws of 2005
shall serve as a steering committee and direct the institute in the
conduct of the assessment and siting study.

(5) The institute shall assemble a local advisory committee to
assist in the conduct of the assessment and siting study. The
committee shall include: (a) The Snohomish county executive; (b) three
members of the house of representatives, including two from the
majority party and one from the minority party, appointed by the
speaker of the house of representatives; (c) three members of the
senate, including two from the majority party and one from the minority
party, appointed by the president of the senate; and (d) six education
or business leaders, two each from Snohomish, Island, and Skagit
counties.

(6) The recommendations to the legislature shall include, but are
not limited to: (a) The type of institution or institutions to be
established; (b) a business and operations plan for the institution if
a new institution is recommended; (c) potential sites for establishment
of an institution; (d) identification of site acquisition costs; and
(e) identification of costs and a process for completing a master plan
for higher education expansion.

(7) The institute shall provide an interim report to the
legislature and the governor by January 15, 2006, and a final report by
December 1, 2006.

Campus Roadway Development (04-2-073)

The reappropriation in this section is subject to the following conditions and limitations:

(1) The purpose of the reappropriation is to complete a predesign
of potential south campus roadway options and general circulation issues that avoids significant impacts on adjacent neighborhoods and conforms to the city of Bellingham traffic plans.

(2) The predesign shall also investigate options to achieve higher rates of alternative modes of transportation among faculty, staff, and students, minimize surface parking, and make improvements for traffic circulation, including public transit. Safe movement of pedestrians and bicyclists shall be a priority.

(3) Allotment for predesign is contingent upon the completion of a communication and public involvement plan for this project that is consistent with the significant projects section of the Western Washington University institutional master plan and adjacent neighborhood plans adopted by the city of Bellingham, the city of Bellingham Western Washington University neighborhood plan, and the neighborhood meeting requirements contained in Bellingham municipal code 20.40.060. The communication and public involvement plan shall seek to maximize public input through coordination of the planning effort with established neighborhood advisory groups and boards recognized by the city of Bellingham.

Facility Preservation Backlog Reduction (04-1-951)

The reappropriation in this section is subject to the following conditions and limitations:
(1) Pursuant to definitions and provisions in section 925, chapter 26, Laws of 2003 1st sp. sess., the reappropriation is provided solely to accomplish preservation work that improves existing state facilities in the worst relative condition for housed programs and current building occupants.

(2) With this reappropriation, the intent is to improve the average condition of state facilities as compared to the baseline conditions documented in report 03-1 of the joint legislative audit and review committee. Preservation backlog reduction project funds shall be prioritized at local discretion to achieve the above stated goal, with particular attention given to buildings currently rated in adequate to marginal condition.

(3) This section is subject to the same allotment procedures as a minor works category.

(4) Section 915 of this act does not apply to this reappropriation.

NEW SECTION. **Sec. 828. FOR THE COMMUNITY AND TECHNICAL COLLEGE SYSTEM**

Preventive Facility Maintenance and Building System Repairs (06-1-750)

The appropriation in this section is subject to the following conditions and limitations:

1. Pursuant to definitions and provisions in section 925, chapter 26, Laws of 2003 1st sp. sess., the appropriation is provided solely to maintain facilities housing educational and general programs and to maintain its major building systems and campus infrastructure. Building maintenance, mechanical adjustments, repairs, and minor works for the facility or its major building systems and campus infrastructure must extend the remaining useful life of the facility or keep it safe and functioning normally.

2. With this appropriation, the intent is to improve the average condition of state facilities as compared to the baseline conditions documented in report 03-1 of the joint legislative audit and review committee. Preventive facility maintenance project funds shall be allocated at the state board's discretion to achieve the above stated performance goal, with particular attention given to buildings currently rated in superior to adequate condition so as to maximize useful life given both the passage of time and intensity with which the space is used.

3. Section 915 of this act does not apply to this appropriation.

4. There is no intent to reappropriate amounts not expended by June 30, 2007.

PART 6
MISCELLANEOUS AND SUPPLEMENTAL PROVISIONS

MISCELLANEOUS PROVISIONS

NEW SECTION. Sec. 901. The estimated debt service costs impacting future general fund expenditures related solely to new capital appropriations within this act are $19,503,912 during the 2005-2007 fiscal period; $128,151,322 during the 2007-2009 fiscal period; $200,451,220 during the 2009-2011 fiscal period; $207,686,311 during the 2011-2013 fiscal period; and $210,558,739 during the 2013-2015 period.

NEW SECTION. Sec. 902. (1) Allotments for appropriations in this act shall be provided in accordance with the capital project review requirements adopted by the office of financial management. The office of financial management shall notify the house of representatives capital budget committee and the senate ways and means committee of allotment releases based on review by the office of financial management. No expenditure may be incurred or obligation entered into for appropriations in this act until the office of financial management has given final approval to the allotment of the funds to be expended or encumbered. For allotments under this act, the allotment process includes, in addition to the statement of proposed expenditures for the current biennium, a category or categories for any reserve amounts and amounts expected to be expended in future biennia. Projects that will be employing alternative public works construction procedures under chapter 39.10 RCW are subject to the allotment procedures defined in this section and RCW 43.88.110. Contracts shall not be executed that call for expenditures in excess of the approved allotment, and the total amount shown in such contracts for the cost of future work that has not been appropriated shall not exceed the amount identified for such work in the level of funding approved by the office of financial management at the completion of predesign.

(2) The legislature intends that each project be defined as proposed to the legislature in the governor's budget document, unless
it clearly appears from the legislative history that the legislature intended to define the scope of a project in a different way.

NEW SECTION. Sec. 903. To ensure that major construction projects are carried out in accordance with legislative and executive intent, appropriations in this act in excess of $5,000,000 shall not be expended or encumbered until the office of financial management has reviewed and approved the agency's predesign and other documents, and approved an allotment for the project that includes specific authorization to enter into a contract to expend or encumber funds. The predesign document shall include but not be limited to program, site, and cost analysis in accordance with the predesign manual adopted by the office of financial management. To improve monitoring of major construction projects, progress reports shall be submitted by the agency administering the project to the office of financial management and to the fiscal committees of the house of representatives and senate. Reports will be submitted on July 1st and December 31st each year in a format to be developed by the office of financial management.

NEW SECTION. Sec. 904. Appropriations in this act for design and construction of facilities on higher education campuses shall be expended only after funds are allotted to institutions of higher education on the basis of: (1) Comparable unit cost standards, as determined by the office of financial management in consultation with the higher education coordinating board; (2) costs consistent with other higher education teaching facilities in the state; and (3) student full-time equivalent enrollment levels as established by the office of financial management in consultation with the higher education coordinating board.

NEW SECTION. Sec. 905. (1) To ensure that minor works appropriations are carried out in accordance with legislative intent, funds appropriated in this act shall not be allotted until project lists are on file at the office of financial management and the office of financial management has formally approved the lists. Proposed revisions to the lists must be filed with and approved by the office of financial management before funds may be expended on the revisions.
(2)(a) Minor works projects are single line appropriations that include multiple projects valued between $25,000 and $1,000,000 each that are of a similar nature and can generally be completed within two years of the appropriation with the funding provided. Minor works categories include (i) health, safety, and code requirements; (ii) facility preservation; (iii) infrastructure preservation; and (iv) program improvement or expansion. Improvements for accessibility in compliance with the Americans with disabilities act may be included in any of the above minor works categories.

(b) Minor works appropriations shall not be used for, among other things: Studies, except for technical or engineering reviews or designs that lead directly to and support a project on the same minor works list; planning; design outside the scope of work on a minor works list; moveable, temporary, and traditionally funded operating equipment not in compliance with the equipment criteria established by the office of financial management; software not dedicated to control of a specialized system; moving expenses; land or facility acquisition; or to supplement funding for projects with funding shortfalls unless expressly authorized elsewhere in this act. The office of financial management may make an exception to the limitations described in this subsection (2)(b) for exigent circumstances after notifying the legislative fiscal committees and waiting ten days for comments by the legislature regarding the proposed exception.

(3) The office of financial management shall forward copies of these project lists and revised lists to the house of representatives capital budget committee and the senate ways and means committee. No expenditure may be incurred or obligation entered into for minor works appropriations until the office of financial management has approved the allotment of the funds to be expended. The office of financial management shall encourage state agencies to incorporate accessibility planning and improvements into the normal and customary capital program.

(4) It is generally not intended to make future appropriations for capital expenditures or for maintenance and operating expenses for an acquisition project or a significant expansion project that is initiated through the minor works process and therefore does not receive a policy and fiscal analysis by the legislature. Minor works
projects are intended to be one-time expenditures that do not require future state resources to complete.

NEW SECTION.  Sec. 906.  (1) It is expected that projects be ready to proceed in a timely manner depending on the type or phase of the project or program that is the subject of the appropriation in this act.  Except for major projects that customarily may take more than two biennia to complete from predesign to the end of construction, or large infrastructure grant or loan programs supporting projects that often take more than two biennia to complete, the legislature generally does not intend to reappropriate funds more than once, particularly for smaller grant programs, local/community projects, and minor works.

(2) Agencies shall expedite the expenditure of reappropriations and appropriations in this act in order to:  (a) Rehabilitate infrastructure resources; (b) accelerate environmental rehabilitation and restoration projects for the improvement of the state's natural environment; (c) reduce additional costs associated with acquisition and construction inflationary pressures; and (d) provide additional employment opportunities associated with capital expenditures.

(3) To the extent feasible, agencies are directed to accelerate expenditure rates at their current level of permanent employees and shall use contracted design and construction services wherever necessary to meet the goals of this section.

(4) The office of financial management shall report the following to the appropriate fiscal committees of the legislature by January 30, 2007:  (a) A listing of reappropriations in the governor's 2007-2009 capital budget recommendation that will be reappropriated more than once and have ten percent or more of the original appropriation unexpended; and (b) an explanation of why the appropriation remains unexpended.

NEW SECTION.  Sec. 907.  ACQUISITION OF PROPERTIES AND FACILITIES THROUGH FINANCIAL CONTRACTS.  The following agencies may enter into financial contracts, paid from any funds of an agency, appropriated or nonappropriated, for the purposes indicated and in not more than the principal amounts indicated, plus financing expenses and required reserves pursuant to chapter 39.94 RCW.  When securing properties under this section, agencies shall use the most economical financial contract
option available, including long-term leases, lease-purchase agreements, lease-development with option to purchase agreements or financial contracts using certificates of participation. Expenditures made by an agency for one of the indicated purposes before the issue date of the authorized financial contract and any certificates of participation therein are intended to be reimbursed from proceeds of the financial contract and any certificates of participation therein to the extent provided in the agency's financing plan approved by the state finance committee.

State agencies may enter into agreements with the department of general administration and the state treasurer's office to develop requests to the legislature for acquisition of properties and facilities through financial contracts. The agreements may include charges for services rendered.

(1) Department of general administration:

(a) Enter into a financing contract for up to $12,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct the fifth and final phase of the roof membrane replacement at the east plaza parking structure as well as safety improvements to the parking garage below the plaza.

(b) Enter into a financing contract for up to $6,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW for the fourth phase of the office building-2 rehabilitation that will renew failing building systems, correct code deficiencies, and improve access.

(c) Enter into a financing contract for up to $13,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW for the rehabilitation of the Cherberg building.

(2) Liquor control board: Enter into a financing contract for up to $17,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct an extension to the liquor control board's distribution center to meet liquor sales growth through 2018.

(3) Department of social and health services: Enter into a financing contract for up to $9,600,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to purchase and install laundry equipment and make laundry building alterations at Western State Hospital. The department, at its option, may increase laundry
utilization with work from other institutions to help pay for this contract or may contract this service out in lieu of the financing authorized in this section.

(4) Department of corrections:
(a) Enter into a financing contract for up to $400,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct a waste transfer station and purchase a garbage truck at the McNeil Island corrections center.
(b) Enter into a financing contract for up to $4,588,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct a transportation services warehouse and offices for correctional industries.
(c) Enter into a financing contract for up to $4,536,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct additions to the food factory and warehouses at the Airway Heights corrections center for correctional industries.

(5) Community and technical colleges:
(a) Enter into a financing contract on behalf of Bellevue Community College for up to $20,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to purchase the North Center building.
(b) Enter into a financing contract on behalf of Clark College for up to $9,100,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct a parking structure.
(c) Enter into a financing contract on behalf of Clover Park Technical College for up to $14,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct a student center.
(d) Enter into a financing contract on behalf of Columbia Basin College for up to $1,500,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to renovate the Hawk Union building.
(e) Enter into a financing contract on behalf of Edmonds Community College for up to $4,000,000 plus financing expenses and required reserves pursuant to chapter 39.94 RCW to construct a black box theater as a part of the Instructional Lab building.
(f) Enter into a financing contract on behalf of Green River
Community College for up to $7,000,000 plus financing expenses and
required reserves pursuant to chapter 39.94 RCW to purchase Kent
Station higher education center.

(g) Enter into a financing contract on behalf of Olympic College
for up to $3,600,000 plus financing expenses and required reserves
pursuant to chapter 39.94 RCW to construct an addition to the student
center bookstore.

(h) Enter into a financing contract on behalf of Shoreline
Community College for up to $15,000,000 plus financing expenses and
required reserves pursuant to chapter 39.94 RCW to construct a student
union building.

(i) Enter into a financing contract on behalf of Skagit Valley
Community College for up to $3,200,000 plus financing expenses and
required reserves pursuant to chapter 39.94 RCW to renovate existing
space into a new student center.

(j) Enter into a financing contract on behalf of Walla Walla
Community College for up to $2,175,100 plus financing expenses and
required reserves pursuant to chapter 39.94 RCW to purchase land and
construct a building for the enology program.

(k) Enter into a financing contract on behalf of Walla Walla
Community College for up to $640,000 plus financing expenses and
required reserves pursuant to chapter 39.94 RCW to construct an
addition to the health sciences building at the Clarkston Center.

(6) Washington State University: Enter into a financing contract
for at least $11,650,000 plus financing expenses and required reserves
pursuant to chapter 39.94 RCW to construct a bioproducts facility in
the Tri-Cities.

(7) Enter into a financing contract on behalf of Seattle Central
Community College for up to $3,000,000 plus financing expenses and
required reserves pursuant to chapter 39.94 RCW to construct a math and
science building.

(8) Enter into a financing contract on behalf of Pierce
College/Puyallup for up to $8,000,000 plus financing expenses and
required reserves pursuant to chapter 39.94 RCW to construct a student
gym and fitness center.

(9) Enter into a financing contract on behalf of Pierce College/Ft.
Steilacoom for up to $5,000,000 plus financing expenses and required
reserves pursuant to chapter 39.94 RCW to construct an addition to the college health and wellness center.

NEW SECTION. Sec. 908. FOR THE ARTS COMMISSION--ART WORK ALLOWANCE POOLING. (1) One-half of one percent of moneys appropriated in this act for original construction of school plant facilities is provided solely for the purposes of RCW 28A.335.210. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the superintendent of public instruction and representatives of school district boards.

(2) One-half of one percent of moneys appropriated in this act for original construction or any major renovation or remodel work exceeding two hundred thousand dollars by colleges or universities is provided solely for the purposes of RCW 28B.10.027. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the board of regents or trustees.

(3) One-half of one percent of moneys appropriated in this act for original construction of any public building by a state agency as defined in RCW 43.17.020 is provided solely for the purposes of RCW 43.17.200. The Washington state arts commission may combine the proceeds from individual projects in order to fund larger works of art or mobile art displays in consultation with the state agency.

(4) At least eighty-five percent of the moneys spent by the Washington state arts commission during the 2005-2007 biennium for the purposes of RCW 28A.335.210, 28B.10.027, and 43.17.200 must be expended solely for direct acquisition of works of art. If chapter . . . (House Bill No. 2188 (funding the conservation of the state art collection)), Laws of 2005 is enacted by June 30, 2005, the commission may use $100,000 of this amount to contract for services to conserve or maintain existing pieces in the state art collection.

NEW SECTION. Sec. 909. The amounts shown under the headings "Prior Biennia," "Future Biennia," and "Total" in this act are for informational purposes only and do not constitute legislative approval of these amounts. "Prior biennia" typically refers to the immediate prior biennium for reappropriations, but may refer to multiple biennia
in the case of specific projects. A "future biennia" amount is an estimate of what may be appropriated for the project or program in the 2007-09 biennium and the following four biennia; an amount of zero does not necessarily constitute legislative intent to not provide funding for the project or program in the future.

NEW SECTION. Sec. 910. "Reappropriations" in this act are appropriations and, unless the context clearly provides otherwise, are subject to the relevant conditions and limitations applicable to appropriations. Reappropriations shall be limited to the unexpended balances remaining on June 30, 2005, from the 2003-2005 biennial appropriations for each project.

NEW SECTION. Sec. 911. To carry out the provisions of this act, the governor may assign responsibility for predesign, design, construction, and other related activities to any appropriate agency.

NEW SECTION. Sec. 912. If any federal moneys appropriated by this act for capital projects are not received by the state, the department or agency to which the moneys were appropriated may replace the federal moneys with funds available from private or local sources. No replacement may occur under this section without the prior approval of the director of financial management in consultation with the senate ways and means committee and the house of representatives capital budget committee.

NEW SECTION. Sec. 913. (1) Unless otherwise stated, for all appropriations under this act that require a match of nonstate money or in-kind contributions, the following requirement, consistent with RCW 43.88.150, shall apply: Expenditures of state money shall be timed so that the state share of project expenditures never exceeds the intended state share of total project costs.

(2) Provision of the full amount of required matching funds is not required to permit the expenditure of capital budget appropriations for phased projects if a proportional amount of the required matching funds is provided for each distinct, identifiable phase of the project.
NEW SECTION. **Sec. 914.** Any capital improvements or capital projects involving construction or major expansion of a state office facility, including, but not limited to, district headquarters, detachment offices, and off-campus faculty offices, must be reviewed by the department of general administration for possible consolidation, colocation, and compliance with state office standards before allotment of funds. The intent of the requirement imposed by this section is to eliminate duplication and reduce total office space requirements where feasible, while ensuring proper service to the public.

NEW SECTION. **Sec. 915.** (1) The governor, through the office of financial management, may authorize a transfer of appropriation authority provided for a capital project that is in excess of the amount required for the completion of such project to another capital project for which the appropriation is insufficient. No such transfer may be used to expand the capacity of any facility beyond that intended by the legislature in making the appropriation. Such transfers may be effected only between capital appropriations to a specific department, commission, agency, or institution of higher education and only between capital projects that are funded from the same fund or account. No transfers may occur between projects to local government agencies except where the grants are provided within a single omnibus appropriation and where such transfers are specifically authorized by the implementing statutes that govern the grants.

(2) For purposes of this section, the governor may find that an amount is in excess of the amount required for the completion of a project only if: (a) The project as defined in the notes to the budget document is substantially complete and there are funds remaining; or (b) bids have been let on a project and it appears to a substantial certainty that the project as defined in the notes to the budget document can be completed within the biennium for less than the amount appropriated in this act.

(3) For the purposes of this section, the intent is that each project be defined as proposed to the legislature in the governor's budget document, unless it clearly appears from the legislative history that the legislature intended to define the scope of a project in a different way.
(4) Transfers of funds to an agency's infrastructure savings appropriation are subject to review and approval by the office of financial management. Expenditures from an infrastructure savings appropriation are limited to projects that have a primary purpose to correct infrastructure deficiencies or conditions that: (a) Adversely affect the ability to utilize the infrastructure for its current programmatic use; (b) reduce the life expectancy of the infrastructure; or (c) increase the operating costs of the infrastructure for its current programmatic use. Eligible infrastructure projects may include structures and surface improvements, site amenities, utility systems outside building footprints and natural environmental changes or requirements as part of an environmental regulation, a declaration of emergency for an infrastructure issue in conformance with RCW 43.88.250, or infrastructure planning as part of a facility master plan.

(5) A report of any transfer effected under this section, except emergency projects or any transfer under $250,000, shall be filed with the legislative fiscal committees of the senate and house of representatives by the office of financial management at least thirty days before the date the transfer is effected. The office of financial management shall report all emergency or smaller transfers within thirty days from the date of transfer.

NEW SECTION. Sec. 916. The military department shall file quarterly progress reports in addition to the annual project progress reporting requirement of RCW 43.88.160(3). These reports must contain local, state, and federal funding reconciliation and balance sheets for all appropriated readiness center projects and detail any federal intentions on future readiness center projects and other facilities.

NEW SECTION. Sec. 917. NONTAXABLE AND TAXABLE BOND PROCEEDS. Portions of the appropriation authority granted by this act from the state building construction account may be transferred to the state taxable building construction account as deemed necessary by the state finance committee to comply with the federal internal revenue service rules and regulations pertaining to the use of nontaxable bond proceeds. The state treasurer shall submit written notification to the
director of financial management if it is determined that a shift of appropriation authority from the state building construction account to the state taxable building construction account is necessary.

NEW SECTION. Sec. 918. The office of financial management, in consultation with the department of general administration, shall identify capital projects that may benefit from an energy analysis to determine whether there are alternate, more economical, and energy efficient means of completing the work. The office of financial management shall hold appropriations in allotment reserve on the following types of capital projects until this analysis can be completed: Heating, ventilation, and air conditioning modifications, chiller plants, steam plants, boilers, chilled water or steam lines, building control systems, lighting improvements, or other major energy using systems that may warrant additional analysis. Agencies receiving appropriations for such projects are encouraged to utilize energy performance contracts or alternative financing for equipment in lieu of state appropriated funds. The office of financial management may transfer funds remaining in allotment reserve to infrastructure savings projects within the agency that has realized savings from energy efficiency alternatives.

Sec. 919. RCW 43.135.045 and 2003 1st sp.s. c 25 s 920 are each amended to read as follows:

(1) The emergency reserve fund is established in the state treasury. During each fiscal year, the state treasurer shall deposit in the emergency reserve fund all general fund--state revenues in excess of the state expenditure limit for that fiscal year. Deposits shall be made at the end of each fiscal quarter based on projections of state revenues and the state expenditure limit. The treasurer shall make transfers between these accounts as necessary to reconcile actual annual revenues and the expenditure limit for fiscal year 2000 and thereafter.

(2) The legislature may appropriate moneys from the emergency reserve fund only with approval of at least two-thirds of the members of each house of the legislature, and then only if the appropriation does not cause total expenditures to exceed the state expenditure limit under this chapter.
(3) The emergency reserve fund balance shall not exceed five percent of annual general fund--state revenues as projected by the official state revenue forecast. Any balance in excess of five percent shall be transferred on a quarterly basis by the state treasurer as follows: Seventy-five percent to the student achievement fund hereby created in the state treasury and twenty-five percent to the general fund balance. The treasurer shall make transfers between these accounts as necessary to reconcile actual annual revenues for fiscal year 2000 and thereafter. When per-student state funding for the maintenance and operation of K-12 education meets a level of no less than ninety percent of the national average of total funding from all sources per student as determined by the most recent published data from the national center for education statistics of the United States department of education, as calculated by the office of financial management, further deposits to the student achievement fund shall be required only to the extent necessary to maintain the ninety-percent level. Remaining funds are part of the general fund balance and these funds are subject to the expenditure limits of this chapter.

(4) The education construction fund is hereby created in the state treasury.

(a) Funds may be appropriated from the education construction fund exclusively for common school construction or higher education construction. During the fiscal years beginning July 1, 2005, and ending June 30, 2007, funds may also be used for higher education facilities preservation and maintenance, and improving technology infrastructure in K-12 school districts.

(b) Funds may be appropriated for any other purpose only if approved by a two-thirds vote of each house of the legislature and if approved by a vote of the people at the next general election. An appropriation approved by the people under this subsection shall result in an adjustment to the state expenditure limit only for the fiscal period for which the appropriation is made and shall not affect any subsequent fiscal period.

(5) Funds from the student achievement fund shall be appropriated to the superintendent of public instruction strictly for distribution to school districts to meet the provisions set out in the student achievement act. Allocations shall be made on an equal per full-time equivalent student basis to each school district.
(6) Earnings of the emergency reserve fund under RCW 43.84.092(4)(a) shall be transferred quarterly to the multimodal transportation account, except for those earnings that are in excess of thirty-five million dollars each fiscal year. Within thirty days following any fiscal year in which earnings transferred to the multimodal transportation account under this subsection did not total thirty-five million dollars, the state treasurer shall transfer from the emergency reserve fund an amount necessary to bring the total deposited in the multimodal transportation account under this subsection to thirty-five million dollars. The revenues to the multimodal transportation account reflected in this subsection provide ongoing support for the transportation programs of the state. However, it is the intent of the legislature that any new long-term financial support that may be subsequently provided for transportation programs will be used to replace and supplant the revenues reflected in this subsection, thereby allowing those revenues to be returned to the purposes to which they were previously dedicated. No transfers from the emergency reserve fund to the multimodal fund shall be made during the 2003-05 fiscal biennium.

Sec. 920. RCW 43.88.032 and 1997 c 96 s 5 are each amended to read as follows:

(1) Normal maintenance costs, except for funds appropriated for facility preservation of state institutions of higher education, shall be programmed in the operating budget rather than in the capital budget.

(2) All debt-financed pass-through money to local governments shall be programmed and separately identified in the budget document.

Sec. 921. RCW 28B.50.360 and 2004 c 277 s 910 are each amended to read as follows:

Within thirty-five days from the date of start of each quarter all collected building fees of each such community and technical college shall be paid into the state treasury, and shall be credited as follows:

(1) On or before June 30th of each year the college board if issuing bonds payable out of building fees shall certify to the state treasurer the amounts required in the ensuing twelve-month period to
pay and secure the payment of the principal of and interest on such bonds. The state treasurer shall thereupon deposit the amounts so certified in the community and technical college capital projects account. Such amounts of the funds deposited in the community and technical college capital projects account as are necessary to pay and secure the payment of the principal of and interest on the building bonds issued by the college board as authorized by this chapter shall be exclusively devoted to that purpose. If in any twelve-month period it shall appear that the amount certified by the college board is insufficient to pay and secure the payment of the principal of and interest on the outstanding building bonds, the state treasurer shall notify the college board and such board shall adjust its certificate so that all requirements of moneys to pay and secure the payment of the principal and interest on all such bonds then outstanding shall be fully met at all times.

(2) The community and technical college capital projects account is hereby created in the state treasury. The sums deposited in the capital projects account shall be appropriated and expended exclusively to pay and secure the payment of the principal of and interest on bonds payable out of the building fees and for the construction, reconstruction, erection, equipping, maintenance, demolition and major alteration of buildings and other capital assets owned by the state board for community and technical colleges in the name of the state of Washington, and the acquisition of sites, rights-of-way, easements, improvements or appurtenances in relation thereto, ((and, during the 2003-05 biennium,)) engineering and architectural services provided by the department of general administration, and for the payment of principal of and interest on any bonds issued for such purposes.

NEW SECTION. Sec. 922. To provide additional financial assistance and relief to irrigation districts and farmers during the current drought, loan principal and interest payments due to the department of ecology from previous biennia loans and loans in the 2005-07 biennium for drought assistance or agricultural water supply projects may be deferred for the 2005-07 biennium. Deferrals are intended only for loan recipients that involve a significant number of farmers who are temporarily leasing or not using their water rights for the benefit of the drought response. The deferrals shall apply to loans from the
state drought preparedness account, the state emergency water projects
revolving account, and state and local improvement revolving account
(water supply facilities). Such loan repayments will resume consistent
with the original loan agreement at the beginning of the 2007-09
biennium.

FOR THE DEPARTMENT OF COMMUNITY, TRADE, AND ECONOMIC DEVELOPMENT

Drinking Water Assistance Account (04-4-002)

The appropriations in this section are subject to the following conditions and limitations:

(1) Expenditures of the appropriation shall comply with RCW 70.119A.170.

(2)(a) The state building construction account appropriation is provided solely to provide assistance to counties, cities, and special purpose districts to identify, acquire, and rehabilitate public water systems that have water quality problems or have been allowed to deteriorate to a point where public health is an issue. Eligibility is confined to applicants that already own at least one group A public water system and that demonstrate a track record of sound drinking water utility management. Funds may be used for: Planning, design, and other preconstruction activities; system acquisition; and capital construction costs.

(b) The state building construction account appropriation must be jointly administered by the department of health, the public works board, and the department of community, trade, and economic development using the drinking water state revolving fund loan program as an administrative model. In order to expedite the use of these funds and minimize administration costs, this appropriation must be administered by guidance, rather than rule. Projects must generally be prioritized using the drinking water state revolving fund loan program criteria. All financing provided through this program must be in the form of grants that must partially cover project costs. The maximum grant to any eligible entity may not exceed twenty-five percent of the funds allocated to this appropriation.

that are essential and mandated activities defined as core services and are included in the engineering and architectural services' responsibilities and task list for general public works projects of normal complexity. The general public works projects included are all those financed by the state capital budget for the biennium ending June 30, 2005, with individual total project values up to $20 million.

(2) The department may negotiate agreements with agencies for additional fees to manage projects financed by financial contracts, other alternative financing, projects with a total value greater than $20 million, or for the nonstate funded portion of projects with mixed funding sources.

(3) The department shall review each community and technical college request and the requests of other client agencies for funding any project over $2.5 million for inclusion in the 2004 supplemental capital budget and the 2005-07 capital budget to ensure that the amount requested by the agency is appropriate for predesign, design, and construction, depending on the phase of the project being requested. The department shall pay particular attention: (a) That the budgeted amount requested is at an appropriate level for the various components that make up the cost of the project such as project management; and (b) that standard measurements such as cost per square foot are reasonable. The department shall also assist the office of financial management with review of other agency projects as requested.
