NEW SECTION. Sec. 201. FOR THE DEPARTMENT OF SOCIAL AND HEALTH SERVICES. (1) Appropriations made in this act to the department of social and health services shall initially be allotted as required by this act. Subsequent allotment modifications shall not include transfers of moneys between sections of this act except as expressly provided in this act, nor shall allotment modifications permit moneys that are provided solely for a specified purpose to be used for other than that purpose.

(2) The department of social and health services shall not initiate any services that require expenditure of state general fund moneys unless expressly authorized in this act or other law. The department may seek, receive, and spend, under RCW 43.79.260 through 43.79.282, federal moneys not anticipated in this act as long as the federal funding does not require expenditure of state moneys for the program in excess of amounts anticipated in this act. If the department receives unanticipated unrestricted federal moneys, those moneys shall be spent for services authorized in this act or in any other legislation providing appropriation authority, and an equal amount of appropriated state general fund moneys shall lapse. Upon the lapsing of any moneys under this subsection, the office of financial management shall notify the legislative fiscal committees. As used in this subsection, "unrestricted federal moneys" includes block grants and other funds that federal law does not require to be spent on specifically defined projects or matched on a formula basis by state funds.

(3) The department is authorized to develop an integrated health care program designed to slow the progression of illness and disability and better manage Medicaid expenditures for the aged and disabled population. Under this Washington medicaid integration partnership (WMIP) the department may combine and transfer such Medicaid funds appropriated under sections 204, 206, 208, and 209 of this act as may be necessary to finance a unified health care plan for the WMIP program enrollment. The WMIP pilot projects shall not exceed a daily enrollment of 6,000 persons during the 2005-2007 biennium. The amount of funding assigned to the pilot projects from each program may not
exceed the average per capita cost assumed in this act for individuals
covered by that program, actuarially adjusted for the health condition
of persons enrolled in the pilot, times the number of clients enrolled
in the pilot. In implementing the WMIP pilot projects, the department
may: (a) Withhold from calculations of "available resources" as set
forth in RCW 71.24.025 a sum equal to the capitated rate for
individuals enrolled in the pilots; and (b) employ capitation financing
and risk-sharing arrangements in collaboration with health care service
contractors licensed by the office of the insurance commissioner and
qualified to participate in both the medicaid and medicare programs.
The department shall conduct an evaluation of the WMIP, measuring
changes in participant health outcomes, changes in patterns of service
utilization, participant satisfaction, participant access to services,
and the state fiscal impact.

3. $1,204,000 of the general fund--state appropriation for fiscal year 2006, $1,204,000 of the general fund--state appropriation for fiscal year 2007, and $5,262,000 of the violence reduction and drug enforcement account appropriation are provided solely to implement community juvenile accountability grants pursuant to chapter 338, Laws of 1997 (juvenile code revisions). 4. $2,544,000 of the violence reduction and drug enforcement account appropriation is provided solely to implement alcohol and substance abuse treatment programs for locally committed offenders.

5. For the purposes of a pilot project, the juvenile rehabilitation administration shall provide a block grant, rather than categorical funding, for consolidated juvenile services, community juvenile accountability act grants, the chemically dependent disposition alternative, and the special sex offender disposition
alternative to the Pierce county juvenile court. To evaluate the effect of decategorizing funding for youth services, the juvenile court shall do the following:

(a) Develop intermediate client outcomes according to the risk assessment tool (RAT) currently used by juvenile courts and in coordination with the juvenile rehabilitation administration;

(b) Track the number of youth participating in each type of service, intermediate outcomes, and the incidence of recidivism within twenty-four months of completion of services;

The juvenile rehabilitation administration, in consultation with the juvenile court administrators, shall develop an equitable distribution formula for the funding provided in this subsection, and negotiate contracts that would avoid the cost of a youth kept in the community costing more than serving the youth in a juvenile rehabilitation institution and parole program on an average daily population basis. The juvenile rehabilitation administration may adjust the funding level provided in this subsection in the event that utilization rates of the disposition alternatives are lower than the level anticipated by the total appropriation to the juvenile rehabilitation administration in this section. The juvenile rehabilitation administration shall report to the appropriate policy...
and fiscal committees of the legislature on the use of the disposition
alternatives and revocations by December 1, 2006. If either bill is
not enacted by June 30, 2005, the amounts provided in this subsection

(b) The entire health services account appropriation and $904,000 of the general fund--federal appropriation are provided solely for health care benefits for agency home care workers who are employed through state contracts for at least twenty hours a week. Home care agencies may obtain coverage either through the basic health plan or through an alternative plan that provides substantially equivalent benefits.

(c) Any new funding for family support and high school transition along with a portion of existing funding for these programs shall be provided as supplemental security income (SSI) state supplemental payments for persons with developmental disabilities in families with taxable incomes at or below 150 percent of median family income. Individuals receiving family support or high school transition payments shall not become eligible for medical assistance under RCW 74.09.510 due solely to the receipt of SSI state supplemental payments.

(d) The department may transfer funding provided in this subsection to meet the purposes of subsection (2) of this section to the extent that fewer residents of residential habilitation centers choose to move to community placements than was assumed in this appropriation.

(e) $822,000 of the general fund--state appropriation for fiscal year 2006, $719,000 of the general fund--state appropriation for fiscal year 2007, and $1,540,000 of the general fund--federal appropriation are provided solely for the purposes of settling all claims and meeting the terms of the settlement agreement in the consolidated lawsuits, Boyle v. Braddock, United States District Court Western District of
Washington at Tacoma, Cause No. C01-5687 FDB and The Arc of Washington v. Quasim, et al., United States District Court Western District of Washington at Tacoma, Cause No. C-99-5577 FDB, covering waiver services. The expenditure of these amounts is contingent on the approval of the parties' settlement agreement by the federal district court and the issuance of a court order staying all waiver claims in both cases until at least April 1, 2008.

(f) $549,000 of the general fund--state appropriation for fiscal year 2006, $1,593,000 of the general fund--state appropriation for fiscal year 2007, and $2,142,000 of the general fund--federal appropriation are provided solely for community residential and support services. The department shall ensure that the average cost per day for all program services other than start-up costs shall not exceed $300. In order to maximize the number of clients served and ensure the cost-effectiveness of the waiver programs, the department will strive to limit new client placement expenditures to 90 percent of the budgeted daily rate. If this can be accomplished, additional clients may be served with excess funds provided the total projected carry-forward expenditures do not exceed the amounts estimated. The department shall electronically report to the appropriate committees of the legislature, within 45 days following each fiscal year quarter, the number of persons served with these additional community services, where they were residing, what kinds of services they were receiving prior to placement, and the actual expenditures for all community services to support these clients.

The department shall ensure that the average cost per day for all program services other than start-up costs shall not exceed $300. In order to maximize the number of clients served and ensure the cost-effectiveness of the waiver programs, the department will strive to limit new client placement expenditures to 90 percent of the budgeted daily rate. If this can be accomplished, additional clients may be served with excess funds if the total projected carry-forward expenditures do not exceed the amounts estimated. The department shall implement the four new waiver programs such that decisions about enrollment levels and the amount, duration, and scope of services maintain expenditures within appropriations. The department shall electronically report to the appropriate committees of the legislature, within 45 days following each fiscal year quarter, the number of persons served with these additional community services, where they were residing, what kinds of services they were receiving prior to placement, and the actual expenditures for all community services to support these clients.

General Fund--State Appropriation (FY 2007) . . . . . . . . $1,584,336,000

Health Services Account--State Appropriation . . . . $639,715,000
TOTAL APPROPRIATION . . . . . . . . . . . . . . . . . . . $7,736,351,000

The appropriations in this section are subject to the following conditions and limitations:

(1) In accordance with RCW 74.46.625, $6,000,000 of the general fund--federal appropriation is provided solely for supplemental payments to nursing homes operated by public hospital districts. The public hospital district shall be responsible for providing the required nonfederal match for the supplemental payment, and the payments shall not exceed the maximum allowable under federal rules. It is the legislature's intent that the payments shall be supplemental...
to and shall not in any way offset or reduce the payments calculated and provided in accordance with part E of chapter 74.46 RCW. It is the legislature's further intent that costs otherwise allowable for rate-setting and settlement against payments under chapter 74.46 RCW shall not be disallowed solely because such costs have been paid by revenues retained by the nursing home from these supplemental payments.

(2) $1,660,000 of the health services account appropriation, $4,361,000 of the general fund--federal appropriation, $1,350,000 of the general fund--state appropriation for fiscal year 2006, and $1,351,000 of the general fund--state appropriation for fiscal year 2007 are provided solely for grants to rural hospitals. The department shall distribute the funds under a formula that provides a relatively larger share of the available funding to hospitals that (a) serve a disproportionate share of low-income and medically indigent patients and (b) have relatively smaller net financial margins, to the extent allowed by the federal medicaid program.

(3) $22,081,000 of the health services account appropriation and $20,714,000 of the general fund--federal appropriation are provided solely for grants to nonrural hospitals. The department shall distribute the funds under a formula that provides a relatively larger share of the available funding to hospitals that (a) serve a disproportionate share of low-income and medically indigent patients and (b) have relatively smaller net financial margins, to the extent allowed by the federal medicaid program.

(4) In response to the federal directive to eliminate intergovernmental transfer transactions effective June 30, 2005, the department is directed to implement the inpatient hospital certified public expenditures program for the 2005-07 biennium. The program shall apply to all public hospitals, including those owned or operated by the state, except those classified as critical access hospitals. Hospitals in the program shall be paid and shall retain (a) one hundred percent of the federal portion of each medicaid inpatient fee-for-service claim payable by the medical assistance administration; and (b) one hundred percent of the federal portion of the maximum disproportionate share hospital payment allowable under federal regulations. Medicaid fee-for-service claim amounts shall be established by applying the department's ratio of costs to charges payment methodology. The department shall provide participating
hospitals with the information needed by the hospital to certify the public expenditures required to qualify for the federal portions of both the medicaid inpatient fee-for-service payments and the disproportionate share hospital payments. The legislature intends that hospitals in the program receive no less in combined state and federal payments than they would have received under the methodology that was in place during fiscal year 2005. The department shall therefore make additional grant payments, not to exceed the amounts provided in this subsection, to hospitals whose total payments under the program would otherwise be less than the total state and federal payments they would have received under the methodology in effect during fiscal year 2005. $37,034,000 of the general fund--state appropriation for fiscal year 2006, $37,552,000 of the general fund--state appropriation for fiscal year 2007, $8,300,000 of the emergency medical services and trauma care systems trust account--state appropriation, and $45,450,000 of the general fund--federal appropriation are provided solely for new state grant and upper payment limit programs for the participating hospitals. 

(5) $3,972,000 of the general fund--state appropriation for fiscal year 2006, $3,990,000 of the general fund--state appropriation for fiscal year 2007, and $63,279,000 of the general fund--federal appropriation are provided solely for development and implementation of a replacement system for the existing medicaid management information system.

(6) $150,000 of the general fund--state appropriation for fiscal year 2006, $75,000 of the general fund--state appropriation for fiscal year 2007, and $225,000 of the general fund--federal appropriation are provided solely for the department to contract for an independent analysis of the medical assistance administration's current system for establishing hospital inpatient payment rates, and for recommendations on a new or updated system. The department shall submit an interim report of study findings by December 1, 2005, and a final report by November 15, 2006. The interim report shall include a comparison of the strengths and weaknesses of the current rate-setting system relative to those used by other state, federal, and private payers. The final report shall include recommendations on the design and implementation of a new or updated system that will promote equity among hospitals, access to quality care for patients, and cost-control and efficiency for taxpayers. The study should make use of complete
and current cost data from a wide variety of hospitals, recognize unique aspects of hospital service delivery structures and medicaid payment systems in Washington, and provide opportunities for comment and participation by key interest groups in the identification and assessment of alternatives.

(7) Payment rates for hospital inpatient and outpatient services shall be increased by an average of 1.2 percent effective September 1, 2005, and by an average of an additional 1.7 percent effective September 1, 2006. The increases shall be provided only on the portion of a hospital's rate that excludes medical education and outlier costs, and shall be allocated so that hospitals with lower costs of care (excluding medical education and outlier costs) receive larger percentage increases than those with higher costs of care. The increases shall be allocated in three percentage increments, with the lowest-cost hospitals receiving the largest percentage rate increase, highest-cost hospitals receiving the smallest percentage increase, and medium-cost hospitals receiving the average of the highest and the lowest percentage rate increase. Increases shall not be provided to those hospitals that are certified as critical access. Sufficient funds are appropriated in this section for Healthy Options contractors to increase hospital payment rates commensurate with the increases in fee-for-service payment rates.

(8) When a person is ineligible for medicaid solely by reason of residence in an institution for mental diseases, the department shall provide the person with the same benefits as he or she would receive if eligible for medicaid, using state-only funds to the extent necessary.

(9) The medical assistance program may use funds appropriated in this section to purchase medical equipment and supplies through third-party purchasing groups when it is cost-effective to do so.

(10) The legislature affirms that it is in the state's interest for Harborview medical center to remain an economically viable component of the state's health care system.

(11) By October 1, 2005, the department shall recommend to the governor and legislature at least two pilot project designs which seem likely to reduce avoidable emergency room utilization at no net cost to the state within the projects' first eighteen months of operation.

Units calculated under (f)(ii) of this subsection shall be reduced by certificated staff units at the rate of forty-six certificated instructional staff units and four certificated administrative staff units per thousand vocational full-time equivalent students;

(4) Fringe benefit allocations shall be calculated at a rate of 11.22 percent in the 2005-06 school year and 11.22 percent in the 2006-07 school year for certificated salary allocations provided under subsection (2) of this section, and a rate of 14.84 percent in the 2005-06 school year and 14.84 percent in the 2006-07 school year for classified salary allocations provided under subsection (3) of this section.

(a) The number of certificated staff units determined in subsection (2) of this section; and

(b) The number of classified staff units determined in subsection (3) of this section multiplied by 1.152. This factor is intended to adjust allocations so that, for the purposes of distributing insurance benefits, full-time equivalent classified employees may be calculated on the basis of 1440 hours of work per year, with no individual employee counted as more than one full-time equivalent.

(6)(a) For nonemployee-related costs associated with each certificated staff unit allocated under subsection (2)(a), (b), and (d) through (h) of this section, there shall be provided a maximum of $9,112 per certificated staff unit in the 2005-06 school year and a maximum of $9,285 per certificated staff unit in the 2006-07 school year.

(7) Allocations for substitute costs for classroom teachers shall be distributed at a maintenance rate of $531.09 for the 2005-06 and 2006-07 school years per allocated classroom teachers exclusive of salary increase amounts provided in section 504 of this act. Solely for the purposes of this subsection, allocated classroom teachers shall be equal to the number of certificated instructional staff units allocated under subsection (2) of this section, multiplied by the ratio between the number of actual basic education certificated teachers and the number of actual basic education certificated instructional staff reported statewide for the prior school year.

(8) Any school district board of directors may petition the superintendent of public instruction by submission of a resolution adopted in a public meeting to reduce or delay any portion of its basic education allocation for any school year. The superintendent of public instruction shall approve such reduction or delay if it does not impair the district's financial condition. Any delay shall not be for more than two school years. Any reduction or delay shall have no impact on levy authority pursuant to RCW 84.52.0531 and local effort assistance pursuant to chapter 28A.500 RCW.

(e) $394,000 of the general fund--state appropriation for fiscal year 2006 and $787,000 of the general fund--state appropriation for fiscal year 2007 are provided solely for the implementation of Substitute Senate Bill No. 5717 (skills centers). If the bill is not enacted before June 30, 2005, the amounts provided in this subsection shall lapse. The funding provided in this subsection shall be used as an incentive to encourage school districts to increase enrollment in vocational skills centers. Up to $500 for each full-time equivalent student may be proportionally distributed to a school district or school districts increasing skills centers enrollment above the levels in the 2004-05 school year. (b) For the fourth through eighth school years following consolidation, the difference between the basic education formula staff units received by the districts for the school year prior to consolidation and the basic education formula staff units after consolidation pursuant to subsection (2)(a) through (h) of this section shall be reduced in increments of twenty percent per year.
NEW SECTION. Sec. 503. FOR THE SUPERINTENDENT OF PUBLIC INSTRUCTION--BASIC EDUCATION EMPLOYEE COMPENSATION. (b) As used in this subsection, the column headings "BA+(N)" refer to the number of credits earned since receiving the baccalaureate degree.

(c) For credits earned after the baccalaureate degree but before the masters degree, any credits in excess of forty-five credits may be counted after the masters degree. Thus, as used in this subsection, the column headings "MA+(N)" refer to the total of:

(i) Credits earned since receiving the masters degree; and

(ii) Any credits in excess of forty-five credits that were earned after the baccalaureate degree but before the masters degree.

(5) For the purposes of this section:

(a) "BA" means a baccalaureate degree.

(b) "MA" means a masters degree.

(c) "PHD" means a doctorate degree.

(d) "Years of service" shall be calculated under the same rules adopted by the superintendent of public instruction.

(e) "Credits" means college quarter hour credits and equivalent in-service credits computed in accordance with RCW 28A.415.020 and 28A.415.023.

(6) No more than ninety college quarter-hour credits received by any employee after the baccalaureate degree may be used to determine compensation allocations under the state salary allocation schedule and LEAP documents referenced in this act, or any replacement schedules and documents, unless:

(a) The employee has a masters degree; or

(b) The credits were used in generating state salary allocations before January 1, 1992.

(7) The certificated instructional staff base salary specified for each district in LEAP Document 12E and the salary schedules in subsection (4)(a) of this section include two learning improvement
days. A school district is eligible for the learning improvement day funds only if the learning improvement days have been added to the 180-day contract year. If fewer days are added, the additional learning improvement allocation shall be adjusted accordingly. The additional days shall be limited to specific activities identified in the state required school improvement plan related to improving student learning that are consistent with education reform implementation, and shall not be considered part of basic education. The principal in each school shall assure that the days are used to provide the necessary school-wide, all staff professional development that is tied directly to the school improvement plan. The school principal and the district superintendent shall maintain documentation as to their approval of these activities. The length of a learning improvement day shall not be less than the length of a full day under the base contract. The superintendent of public instruction shall ensure that school districts adhere to the intent and purposes of this subsection.

(8) The salary allocation schedules established in this section are for allocation purposes only except as provided in RCW 28A.400.200(2) and subsection (7) of this section.

The appropriations in this section are subject to the following conditions and limitations:

(1) Each general fund fiscal year appropriation includes such funds as are necessary to complete the school year ending in the fiscal year and for prior fiscal year adjustments.

(2) A maximum of $796,000 of this fiscal year 2006 appropriation and a maximum of $812,000 of the fiscal year 2007 appropriation may be expended for regional transportation coordinators and related activities. The transportation coordinators shall ensure that data submitted by school districts for state transportation funding shall, to the greatest extent practical, reflect the actual transportation activity of each district.

(3) $5,000 of the fiscal year 2006 appropriation and $5,000 of the fiscal year 2007 appropriation are provided solely for the transportation of students enrolled in "choice" programs. Transportation shall be limited to low-income students who are transferring to "choice" programs solely for educational reasons.

(4) Allocations for transportation of students shall be based on reimbursement rates of $41.56 per weighted mile in the 2005-06 school year and $41.80 per weighted mile in the 2006-07 school year exclusive of salary and benefit adjustments provided in section 504 of this act. Allocations for transportation of students transported more than one radius mile shall be based on weighted miles as determined by superintendent of public instruction multiplied by the per mile reimbursement rates for the school year pursuant to the formulas adopted by the superintendent of public instruction. Allocations for transportation of students living within one radius mile shall be based on the number of enrolled students in grades kindergarten through five living within one radius mile of their assigned school multiplied by the per mile reimbursement rate for the school year multiplied by 1.29.
(5) For busses purchased between July 1, 2005, and June 30, 2007, the office of superintendent of public instruction shall provide reimbursement funding to a school district only after the superintendent of public instruction determines that the school bus was purchased from the list established pursuant to RCW 28A.160.195(2) or a comparable competitive bid process based on the lowest price quote based on similar bus categories to those used to establish the list pursuant to RCW 28A.160.195. The competitive specifications shall meet federal motor vehicle safety standards, minimum state specifications as established by rule by the superintendent, and supported options as determined by the superintendent in consultation with the regional transportation coordinators of the educational service districts.

(6) Beginning with the 2005-06 school year, the superintendent of public instruction shall base depreciation payments for school district buses on the five-year average of prices in the appropriate category of bus. In the final year on the depreciation schedule, the depreciation payment shall be based on the current state price. The superintendent may include a weighting or other adjustment factor in the averaging formula to ease the transition from the current-price depreciation system to the average depreciation system. Prior to making any depreciation payment in the 2005-06 school year, the superintendent shall notify the office of financial management and the fiscal committees of the legislature of the specific depreciation formula to be used. The replacement cost shall be based on the lowest quote in the appropriate bus category for that school year.

(7) In addition to the allocations for transportation of students in subsection (4) of this section, school districts shall be allocated $0.17 per weighted mile in the 2005-06 school year and $0.17 per weighted mile in the 2006-07 school year exclusive of salary and benefit adjustments provided in section 504 of this act. For the purposes of this subsection, the weighted miles will be calculated based on the actual reported amounts for the 2004-05 school year. The total amount allocated pursuant to this subsection shall be limited to $1,534,000 for the 2005-07 biennium.

NEW SECTION. Sec. 507. FOR THE SUPERINTENDENT OF PUBLIC INSTRUCTION--FOR SPECIAL EDUCATION PROGRAMS

General Fund--State Appropriation (FY 2006) . . . . . . . . . . . . . . . . . . . . . $456,306,000
General Fund--State Appropriation (FY 2007) . . . . . . . . . . . . . . . . . . . . . $464,586,000

TOTAL APPROPRIATION . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . . $1,356,345,000

The appropriations in this section are subject to the following conditions and limitations:

(1) Funding for special education programs is provided on an excess cost basis, pursuant to RCW 28A.150.390. School districts shall ensure that special education students as a class receive their full share of the general apportionment allocation accruing through sections 502 and 504 of this act. To the extent a school district cannot provide an appropriate education for special education students under chapter 28A.155 RCW through the general apportionment allocation, it shall provide services through the special education excess cost allocation funded in this section.

(2)(a) The superintendent of public instruction shall use the excess cost methodology developed and implemented for the 2001-02 school year using the S-275 personnel reporting system and all related accounting requirements to ensure that:

(i) Special education students are basic education students first;
(ii) As a class, special education students are entitled to the full basic education allocation; and

(iii) Special education students are basic education students for the entire school day.

(b) The S-275 and accounting changes in effect since the 2001-02 school year shall supercede any prior excess cost methodologies and shall be required of all school districts.

(3) Each fiscal year appropriation includes such funds as are necessary to complete the school year ending in the fiscal year and for prior fiscal year adjustments.

(4) The superintendent of public instruction shall distribute state and federal funds to school districts based on two categories: The optional birth through age two program for special education eligible developmentally delayed infants and toddlers, and the mandatory special education program for special education eligible students ages three to twenty-one. A "special education eligible student" means a student receiving specially designed instruction in accordance with a properly formulated individualized education program.

(5)(a) For the 2005-06 and 2006-07 school years, the superintendent shall make allocations to each district based on the sum of:

(i) A district's annual average headcount enrollment of developmentally delayed infants and toddlers ages birth through two, multiplied by the district's average basic education allocation per full-time equivalent student, multiplied by 1.15; and

(ii) A district's annual average full-time equivalent basic education enrollment multiplied by the funded enrollment percent determined pursuant to subsection (6)(b) of this section, multiplied by the district's average basic education allocation per full-time equivalent student multiplied by 0.9309.

(b) For purposes of this subsection, "average basic education allocation per full-time equivalent student" for a district shall be based on the staffing ratios required by RCW 28A.150.260 and shall not include enhancements, secondary vocational education, or small schools.

(6) The definitions in this subsection apply throughout this section.

(a) "Annual average full-time equivalent basic education enrollment" means the resident enrollment including students enrolled through choice (RCW 28A.225.225) and students from nonhigh districts
(RCW 28A.225.210) and excluding students residing in another district
enrolled as part of an interdistrict cooperative program (RCW
28A.225.250).

(b) "Enrollment percent" means the district's resident special
education annual average enrollment, excluding the birth through age
two enrollment, as a percent of the district's annual average full-time
equivalent basic education enrollment.

Each district's general fund--state funded special education
enrollment shall be the lesser of the district's actual enrollment
percent or 12.7 percent.

(7) At the request of any interdistrict cooperative of at least 15
districts in which all excess cost services for special education
students of the districts are provided by the cooperative, the maximum
enrollment percent shall be calculated in accordance with subsection
(6)(b) of this section, and shall be calculated in the aggregate rather
than individual district units. For purposes of this subsection, the
average basic education allocation per full-time equivalent student
shall be calculated in the aggregate rather than individual district
units.

(8) To the extent necessary, $18,945,000 of the general fund--state
appropriation and $28,698,000 of the general fund--federal
appropriation are provided for safety net awards for districts with
demonstrated needs for special education funding beyond the amounts
provided in subsection (5) of this section. If safety net awards
exceed the amount appropriated in this subsection (8), the
superintendent shall expend all available federal discretionary funds
necessary to meet this need. Safety net funds shall be awarded by the
state safety net oversight committee subject to the following
conditions and limitations:

(a) The committee shall consider unmet needs for districts that can
convincingly demonstrate that all legitimate expenditures for special
education exceed all available revenues from state funding formulas.
In the determination of need, the committee shall also consider
additional available revenues from federal sources. Differences in
program costs attributable to district philosophy, service delivery
choice, or accounting practices are not a legitimate basis for safety
net awards.
(b) The committee shall then consider the extraordinary high cost needs of one or more individual special education students. Differences in costs attributable to district philosophy, service delivery choice, or accounting practices are not a legitimate basis for safety net awards.

(c) The maximum allowable indirect cost for calculating safety net eligibility may not exceed the federal restricted indirect cost rate for the district plus one percent.

(d) Safety net awards shall be adjusted based on the percent of potential medicaid eligible students billed as calculated by the superintendent in accordance with chapter 318, Laws of 1999.

(e) Safety net awards must be adjusted for any audit findings or exceptions related to special education funding.

(9) The superintendent of public instruction may adopt such rules and procedures as are necessary to administer the special education funding and safety net award process. Prior to revising any standards, procedures, or rules, the superintendent shall consult with the office of financial management and the fiscal committees of the legislature.

(10) The safety net oversight committee appointed by the superintendent of public instruction shall consist of:

(a) One staff from the office of superintendent of public instruction;

(b) Staff of the office of the state auditor who shall be nonvoting members of the committee; and

(c) One or more representatives from school districts or educational service districts knowledgeable of special education programs and funding.

(11) A maximum of $100,000 of the general fund--federal appropriation shall be expended to create a special education ombudsman program within the office of superintendent of public instruction. The purpose of the program is to provide support to parents, guardians, educators, and students with disabilities. The program will provide information to help families and educators understand state laws, rules, and regulations, and access training and support, technical information services, and mediation services. The ombudsman program will provide data, information, and appropriate recommendations to the office of superintendent of public instruction, school districts,
educational service districts, state need projects, and the parent and
teacher information center.

(12) The superintendent of public instruction, consistent with the
new federal IDEA reauthorization, shall continue to educate schools on
how to implement a birth-to-three program and the cost effectiveness
and learning benefits of early intervention.

(13) A maximum of $678,000 may be expended from the general fund--
state appropriations to fund 5.43 full-time equivalent teachers and 2.1
full-time equivalent aides at children's orthopedic hospital and
medical center. This amount is in lieu of money provided through the
home and hospital allocation and the special education program.

(14) $1,000,000 of the general fund--federal appropriation is
provided for projects to provide special education students with
appropriate job and independent living skills, including work
experience where possible, to facilitate their successful transition
out of the public school system. The funds provided by this subsection
shall be from federal discretionary grants.

(15) The superintendent shall maintain the percentage of federal
flow-through to school districts at 85 percent. In addition to other
purposes, school districts may use increased federal funds for high-
cost students, for purchasing regional special education services from
educational service districts, and for staff development activities
particularly relating to inclusion issues.

(16) A maximum of $1,200,000 of the general fund--federal
appropriation may be expended by the superintendent for projects
related to use of inclusion strategies by school districts for
provision of special education services.

(17) A school district may carry over from one year to the next
year up to 10 percent of the general fund--state funds allocated under
this program; however, carry over funds shall be expended in the
special education program.

To the extent that moneys are disbursed on a loan basis, the corresponding appropriation shall be reduced by the amount of loan moneys disbursed from the treasury during the 2003-05 biennium.

NEW SECTION. Sec. 902. INFORMATION SYSTEMS PROJECTS. Agencies shall comply with the following requirements regarding information systems projects when specifically directed to do so by this act.

(1) Agency planning and decisions concerning information technology shall be made in the context of its information technology portfolio. "Information technology portfolio" means a strategic management approach in which the relationships between agency missions and information technology investments can be seen and understood, such that: Technology efforts are linked to agency objectives and business plans; the impact of new investments on existing infrastructure and business functions are assessed and understood before implementation; and agency activities are consistent with the development of an integrated, nonduplicative statewide infrastructure.

(2) Agencies shall use their information technology portfolios in making decisions on matters related to the following:

(a) System refurbishment, acquisitions, and development efforts;
(b) Setting goals and objectives for using information technology in meeting legislatively-mandated missions and business needs;
(c) Assessment of overall information processing performance, resources, and capabilities;
(d) Ensuring appropriate transfer of technological expertise for the operation of any new systems developed using external resources; and
(e) Progress toward enabling electronic access to public information.
Each project will be planned and designed to take optimal advantage of Internet technologies and protocols. Agencies shall ensure that the project is in compliance with the architecture, infrastructure, principles, policies, and standards of digital government as maintained by the information services board.

(4) The agency shall produce a feasibility study for information technology projects at the direction of the information services board and in accordance with published department of information services policies and guidelines. At a minimum, such studies shall include a statement of: (a) The purpose or impetus for change; (b) the business value to the agency, including an examination and evaluation of benefits, advantages, and cost; (c) a comprehensive risk assessment based on the proposed project's impact on both citizens and state operations, its visibility, and the consequences of doing nothing; (d) the impact on agency and statewide information infrastructure; and (e) the impact of the proposed enhancements to an agency's information technology capabilities on meeting service delivery demands.

(5) The agency shall produce a comprehensive management plan for each project. The plan or plans shall address all factors critical to successful completion of each project. The plan(s) shall include, but is not limited to, the following elements: A description of the problem or opportunity that the information technology project is intended to address; a statement of project objectives and assumptions; a definition and schedule of phases, tasks, and activities to be accomplished; and the estimated cost of each phase. The planning for the phased approach shall be such that the business case justification for a project needs to demonstrate how the project recovers cost or adds measurable value or positive cost benefit to the agency's business functions within each development cycle.

(6) The agency shall produce quality assurance plans for information technology projects. Consistent with the direction of the information services board and the published policies and guidelines of the department of information services, the quality assurance plan shall address all factors critical to successful completion of the project and successful integration with the agency and state information technology infrastructure. At a minimum, quality assurance plans shall provide time and budget benchmarks against which project progress can be measured, a specification of quality assurance
responsibilities, and a statement of reporting requirements. The quality assurance plans shall set out the functionality requirements for each phase of a project.

(7) A copy of each feasibility study, project management plan, and quality assurance plan shall be provided to the department of information services, the office of financial management, and legislative fiscal committees. The plans and studies shall demonstrate a sound business case that justifies the investment of taxpayer funds on any new project, an assessment of the impact of the proposed system on the existing information technology infrastructure, the disciplined use of preventative measures to mitigate risk, and the leveraging of private-sector expertise as needed. Authority to expend any funds for individual information systems projects is conditioned on the approval of the relevant feasibility study, project management plan, and quality assurance plan by the department of information services and the office of financial management.

(8) Quality assurance status reports shall be submitted to the department of information services, the office of financial management, and legislative fiscal committees at intervals specified in the project's quality assurance plan.

NEW SECTION. Sec. 903. BUSINESS CONTINUITY AND DISASTER RECOVERY. State agencies shall comply with the business continuity and disaster recovery policies, guidelines, and statements of direction developed by the department of information services and the information services board in consultation with state agencies. To ensure that agency business continuity and disaster recovery activities identify the primary risks across state agencies, account for dependencies between agencies, capitalize on economies of scale, and avoid unnecessary duplication of costs and efforts, state agencies shall receive the prior approval of the department of information services before implementing business continuity and disaster recovery strategies and expending funds for business continuity activities.

NEW SECTION. Sec. 904. VIDEO TELECOMMUNICATIONS. The department of information services shall act as lead agency in coordinating video telecommunications services for state agencies. As lead agency, the department shall develop standards and common specifications for leased
and purchased telecommunications equipment and assist state agencies in
developing a video telecommunications expenditure plan. No agency may
spend any portion of any appropriation in this act for new video
telecommunication equipment, new video telecommunication transmission,
or new video telecommunication programming, or for expanding current
video telecommunication systems without first complying with chapter
43.105 RCW, including but not limited to, RCW 43.105.041(2), and
without first submitting a video telecommunications expenditure plan,
in accordance with the policies of the department of information
services, for review and assessment by the department of information
services under RCW 43.105.052. Prior to any such expenditure by a
public school, a video telecommunications expenditure plan shall be
approved by the superintendent of public instruction. The office of
the superintendent of public instruction shall submit the plans to the
department of information services in a form prescribed by the
department. The office of the superintendent of public instruction
shall coordinate the use of video telecommunications in public schools
by providing educational information to local school districts and
shall assist local school districts and educational service districts
in telecommunications planning and curriculum development. Prior to
any such expenditure by a public institution of postsecondary
education, a telecommunications expenditure plan shall be approved by
the higher education coordinating board. The higher education
coordinating board shall coordinate the use of video telecommunications
for instruction and instructional support in postsecondary education,
including the review and approval of instructional telecommunications
course offerings.

NEW SECTION. Sec. 905. PROGRAM COST SHIFTS. Any program costs

allocations are made from the governor's emergency fund appropriation
to an agency that is financed in whole or in part by other than general

NEW SECTION. Sec. 909. VOLUNTARY SEPARATION INCENTIVES. As a management tool to reduce costs and make more effective use of resources, while improving employee productivity and morale, agencies may offer voluntary separation and/or downshifting incentives and options according to procedures and guidelines established by the department of personnel and the department of retirement systems in consultation with the office of financial management. The options may include, but are not limited to, financial incentives for: Voluntary resignation and retirement, voluntary leave-without-pay, voluntary workweek or work hour reduction, voluntary downward movement, or temporary separation for development purposes. No employee shall have a contractual right to a financial incentive offered pursuant to this section. Agencies shall report on the outcomes of their plans, and offers shall be reviewed and monitored jointly by the department of personnel and the department of retirement systems, for reporting to the office of financial management by December 1, 2006.
NEW SECTION. Sec. 910. VOLUNTARY RETIREMENT INCENTIVES. It is the intent of the legislature that agencies may implement a voluntary retirement incentive program that is cost neutral or results in cost savings provided that such a program is approved by the director of retirement systems and the office of financial management. Agencies participating in this authorization are required to submit a report by June 30, 2007, to the legislature and the office of financial management on the outcome of their approved retirement incentive program. The report should include information on the details of the program including resulting service delivery changes, agency efficiencies, the cost of the retirement incentive per participant, the total cost to the state, and the projected or actual net dollar savings over the 2005-07 biennium.

NEW SECTION. Sec. 911. AGENCY EXPENDITURES FOR MOTOR VEHICLES. The use of hybrid motor vehicles reduces air contaminants, greenhouse gas emissions and reliance on imported sources of petroleum. To foster the use of hybrid motor vehicles, beginning July 1, 2005, before the purchase or lease of a motor vehicle, state agencies should first consider the feasibility of hybrid motor vehicles. State agencies should strive to purchase or lease a hybrid motor vehicle when the use of such vehicle is consistent with and can accomplish the agency's mission and when the purchase is financially reasonable. The financial assessment should include savings accruing from reduced fuel purchases over the life of the vehicle. Agencies shall report on their purchases of hybrid vehicles in their biennial sustainability plans as required under executive order 02-03.

The categories shall be developed to produce minimum
long-range operating costs, including costs of equipment and all costs in operating the vehicles. The categories, for purposes of comparative studies, will be at a minimum the same as those in the beginning of the 1994-95 school year. The competitive specifications shall meet federal motor vehicle safety standards, minimum state specifications as established by rule by the superintendent, and supported options as determined by the superintendent in consultation with the regional transportation coordinators of the educational service districts. In fiscal years 2006 and 2007, the superintendent may solicit and accept price quotes for a rear-engine category school bus that shall be reimbursed at the price of the corresponding front engine category.

(3) The superintendent shall base the level of reimbursement to school districts and educational service districts for school buses on the lowest quote in each category.

(4) Notwithstanding RCW 28A.335.190, school districts and educational service districts may purchase at the quoted price directly from the dealer who is providing the lowest competitive price quote on the list established under subsection (2) of this section and in fiscal years 2006 and 2007 from any dealer on the list established under subsection (2)(b) of this section. School districts and educational service districts may make their own selections for school buses, but shall be reimbursed at the rates determined under subsection (3) of this section and RCW 28A.160.200. District-selected options shall not be reimbursed by the state. For the fiscal biennium, school districts and educational service districts shall be reimbursed for buses purchased only through a lowest-price competitive bid process conducted pursuant to RCW 28A.335.190 or through the state bid process established by this section.
This section does not prohibit school districts or educational service districts from conducting their own competitive bid process. The superintendent of public instruction may adopt rules under chapter 34.05 RCW to implement this section.

For purposes of this subsection (3)(a)(v), "abandoned or derelict vessels" means vessels that have little or no value and either have no identified owner or have an identified owner lacking financial resources to clean up and dispose of the vessel. Funds for plans and programs shall be allocated consistent with the priorities and matching requirements established in chapters 70.105, 70.95C, 70.95I, and 70.95 RCW. During the 1999-2001 fiscal biennium, moneys in the account may also be used for the following activities: Conducting a study of whether dioxins occur in fertilizers, soil amendments, and soils; reviewing applications for registration of fertilizers; and conducting a study of plant uptake of metals. During the (2003-05) 2005-2007 fiscal biennium, the legislature may transfer from the local toxics control...
account to the state toxics control account such amounts as specified
in the omnibus operating budget bill for methamphetamine lab cleanup.
During the 2005-2007 fiscal biennium, moneys in the account may also be
used for grants to local governments to retrofit public sector diesel
equipment and for storm water planning and implementation activities.

(b) Funds may also be appropriated to the department of health to
implement programs to reduce testing requirements under the federal
safe drinking water act for public water systems. The department of
health shall reimburse the account from fees assessed under RCW

(4) Except for unanticipated receipts under RCW 43.79.260 through
43.79.282, moneys in the state and local toxics control accounts may be
spent only after appropriation by statute.

(5) One percent of the moneys deposited into the state and local
toxics control accounts shall be allocated only for public
participation grants to persons who may be adversely affected by a
release or threatened release of a hazardous substance and to not-for-
profit public interest organizations. The primary purpose of these
grants is to facilitate the participation by persons and organizations
in the investigation and remedying of releases or threatened releases
of hazardous substances and to implement the state's solid and
hazardous waste management priorities. However, during the 1999-2001
fiscal biennium, funding may not be granted to entities engaged in
lobbying activities, and applicants may not be awarded grants if their
cumulative grant awards under this section exceed two hundred thousand
dollars. No grant may exceed sixty thousand dollars. Grants may be
renewed annually. Moneys appropriated for public participation from
either account which are not expended at the close of any biennium
shall revert to the state toxics control account.

(6) No moneys deposited into either the state or local toxics
control account may be used for solid waste incinerator feasibility
studies, construction, maintenance, or operation.

(7) The department shall adopt rules for grant or loan issuance and
performance.

(8) During the 2005-2007 fiscal biennium, the legislature may
transfer from the state toxics control account to the state general
fund such amounts as reflect the excess fund balance of the fund.

For the period July 1, 2005, to June 30, 2007, moneys in the account may be used to process applications received by the department that seek to make changes to or transfer existing water rights, for water conveyance projects, and for grants and technical assistance to public bodies for watershed planning under chapter 90.82 RCW. No more than three percent of the moneys deposited in the account may be used by the department to pay for the administration of the grant and loan program authorized by this chapter.
