# 2009-11 CAPITAL BUDGET HIGHLIGHTS

---

## DEBT LIMIT CONSIDERATIONS

### Overview of Bond Capacity

Washington State currently has a 7 percent statutory and 9 percent Constitutional debt limit. The state cannot issue bonds for which the debt service on the new bonds, when added to the debt service on existing bonds, would exceed 7 percent of a three-year average of general state revenues under the statutory limitation and 9 percent under the Constitutional limitation.

The House Chair budget proposal assumes passage of House Bill 1454 or the companion Senate Bill 5537. The bills align the 7 percent and 9 percent Constitutional debt limits. The proposal also assumes passage of Senate Bill 5073, which increases the general state revenue on which the debt limit is calculated by eliminating the statutory dedications and abolishing the following near general fund accounts: the Health Services Account, the Violence Reduction and Drug Enforcement Account, the Water Quality Account, and the Public Safety and Education Account (including the Equal Justice Subaccount).

The new capital budget appropriation bond capacity is approximately \$1.8 billion for the 2009-11 biennium and the 2009 supplemental budget, based on the 9 percent debt limit, the elimination of the four near general fund accounts, the current interest rate and revenue assumptions, and other variables. Appropriations made in the supplemental budget allow for a total of approximately \$2 billion bond appropriation capacity.

### Revenue Transferred to the Operating Budget (\$780 million)

Several dedicated state accounts traditionally appropriated in the capital budget are transferred to the operating budget, including, but not limited to, lottery revenue used for school construction, Public Works Assistance Account revenue used for local infrastructure projects, and Model Toxics Control Act accounts (State Toxics and Local Toxics) used for environmental cleanup, and a portion of the higher education building fee accounts used for minor works construction projects at the community and technical colleges and the four-year higher education institutions.

Many of the programs traditionally funded with the revenues that were transferred to the operating budget are funded in the capital budget with bonds.

## **K-12 ASSISTANCE**

### **School Construction Assistance (\$850 million)**

K-12 school construction assistance grants are provided from the following: \$585 million from state general obligation bonds, \$68 million in school construction/skills center bonds, and \$177 million from the Common School Construction Account (CSCA). The CSCA receives revenue from a variety of sources, including timber revenue, trust land transfers through the Department of Natural Resources, federal revenue, and investment and interest income. Additional funding totaling \$20 million is provided for Seattle Public Schools, skills center minor works, and skills centers in Wenatchee and northeast King County.

### **Environmental Health and Safety Repairs (\$22 million)**

State general obligation bonds in the amount of \$20 million are provided for a grant program to assist school districts in making facility improvements to meet the state Board of Health's proposed new environmental health and safety rules. An additional \$2 million is provided for the small repairs program to provide school districts with grants of up to \$100,000 for urgent health and safety repairs and renovations.

# HIGHER EDUCATION

## Higher Education Capital Projects (\$642 billion)

The House Chair budget proposal includes \$496 million in state bonds and \$642 million total funds, including certificates of participation for higher education institution facilities. Of the state bond amount, \$336 million is provided for the community and technical college system and \$160 million for the four-year institutions. Approximately \$303 million is provided specifically for preservation and minor works projects for the higher education facilities.

## Major Community and Technical College Projects (\$447 million)

Funding and certificate of participation authorization is provided for a variety of major projects at community and technical colleges throughout the state, including, but not limited to, the following:

- \$28 million for a humanities and classroom building at Green River Community College.
- \$26 million for the wood construction center at Seattle Central Community College.
- \$21 million for a vocational building at Columbia Basin College.
- \$35 million for a business and humanities center at Peninsula College.
- \$29 million for a chemistry and life sciences building at Spokane Falls Community College.
- \$32 million for the Technical Education Building at Spokane Community College.
- \$29 million for the Instructional Resource Center at Bellingham Technical College.
- \$21 million for Cascade Core Phase II at Pierce College Fort Steilacoom.

## Major Four-Year Institution Projects (\$260 million)

Funding through bond appropriations and certificates of participation is provided for major four-year institution projects, including, but not limited to, the following:

- \$38 million certificate of participation to renovate Balmer Hall at the University of Washington.
- \$5 million for Tacoma Branch Campus land acquisition for the University of Washington.
- \$18 million in bonds to construct an addition to Hogue Hall at Central Washington University.
- \$6 million in bonds for two Global Animal Health buildings (Animal Diagnostic and Research Biocontainment) at Washington State University.
- \$7.7 million in bonds for design of the Carver Academic Complex at Western Washington University.
- \$4.8 million for the Library/Art Annex renovation at The Evergreen State College.

## **NATURAL RESOURCES**

### **Habitat Preservation and Outdoor Recreation (\$218 million)**

Over \$218 million is provided to improve public access to recreation lands and preserve open space and habitat. Through the Washington Wildlife and Recreation Program (WWRP), \$80 million is provided for habitat, outdoor recreation, riparian protection, and farmland preservation projects. The Trust Land Transfer appropriation of \$95 million is provided to the Department of Natural Resources to purchase and lease timberlands from the school trust and transfer those lands to recreation and habitat status. Through the Aquatic Lands Enhancement Grant Program, \$5 million is provided for tideland acquisition, restoration, and access. The State Parks and Recreation Commission is provided nearly \$38 million in state, federal, and local authority to preserve and improve the state park system.

### **Puget Sound and Salmon Recovery (\$233 million)**

Funding is provided for Puget Sound restoration, clean-up, land acquisition, and enhancements. Grant funding provided through the Recreation and Conservation Office includes \$40 million for Puget Sound land acquisition, restoration, and estuary protection and \$22 million for salmon habitat protection and restoration. Of the WWRP total funding, \$12 million is provided for projects that address Puget Sound and salmon recovery. Over one-fifth of state parks and recreation capital funding is provided for wastewater and stormwater improvements at state parks located on the Puget Sound and Hood Canal. Additionally, \$124 million in funding is provided to the Department of Ecology for water quality protection and spill prevention grants and programs.

# **GOVERNMENT OPERATIONS**

## **Assistance to Local Governments (\$503 million)**

Funding is provided to assist local governments in repairing and developing infrastructure systems. The Community Economic Revitalization Board (CERB) receives \$13 million for loans to local governments to assist with financing publicly-owned development infrastructure improvements to encourage new development and expansion. The Public Works Board is provided \$95 million in bonds in the supplemental budget to continue loans to local governments that are repairing and upgrading infrastructure. Local and community projects receive \$24 million and an appropriation of \$5 million is provided for the development of community schools.

Funding in the amount of \$102 million is provided in state and federal funds through the Department of Health and the Department of Community, Trade, and Economic Development for low-interest rate loans and technical assistance to water systems statewide to protect and improve the state's drinking water facilities and resources (\$38.4 million of the total is provided from the American Recovery and Reinvestment Act of 2009). The Department of Ecology receives \$263 million for Remedial Action Grants to help local governments clean up contaminated sites, using a "worst-first" approach; for sewer systems, stormwater systems, and septic projects through the Centennial Clean Water and the Water Pollution Control Revolving programs; and for Coordinated Prevention Grants for local government waste prevention and solid waste regulatory projects.

## **Competitive Grant Programs (\$61 million)**

Funding is provided for competitive grant programs that assist nonprofit organizations in developing facilities for the arts (Building for the Arts), youth recreation (Youth Recreational Facilities), community services (Building Communities Fund), and historic preservation (Heritage Grants).

## **Housing (\$110 million)**

State funding in the amount of \$110 million is provided for housing assistance to low-income persons. This state funding for housing will complement approximately \$144 million in federal funding provided through the American Recovery and Reinvestment Act of 2009.

## **Preservation of Assets (\$678 million)**

Approximately one-quarter of the budget is appropriated for projects that preserve the state's public assets through renovation, preservation, and minor works projects in most agencies. General government agencies receive appropriations in the amount of \$39 million for preservation projects, and human service agencies are provided \$33 million to protect state assets. Natural resource agencies receive \$37 million for preservation projects. For preservation and renovation of campus facilities, higher education institutions receive \$303 million. K-12 public schools receive \$266 million for school repair and modernization.

## **Federal Stimulus Funding (\$367 million)**

Spending authority for federal stimulus funding from the American Recovery and Reinvestment Act of 2009 (ARRA) is provided for energy efficiency programs, environmental clean-up, habitat restoration, and ecosystem improvements. Through the Department of Community, Trade, and Economic Development, ARRA appropriation authority is provided for multiple programs, including \$61 million for weatherization and \$67 million for energy programs, including the Energy Freedom program expansion created by ESHB 2289. Nearly \$98 million is provided in ARRA funding for environmental clean-up through the Department of Ecology, including \$68.7 million for the Water Pollution Control Revolving Fund Program and \$29 million for rural water and waste disposal. An additional \$38.5 million is added to the Drinking Water Assistance Program. Federal spending authority in the amount of \$60 million is provided through the Recreation and Conservation Office for habitat restoration grants and \$20 million through the Department of Natural Resources for hazardous fuels reduction, forest health, and ecosystem improvements.
